

Frontend Developer

We are looking for a *middle-level* Frontend Developer to work on technically challenging projects. Main part of the work is integrations with e-commerce platforms like Shopify and Magento so experience at building plugins for platforms will be an advantage for candidates

RESPONSIBILITIES/JOB ROLE

- Design the architecture, plan, develop and release new features for our plugins on different platforms
- Take the lead on new features as required
- Work with JavaScript and CSS
- Server-side API: strictly typed and well defined data-only API
- Work in a remote team, actively collaborating with fellow developers, Quality Assurance, Product owner and designers
- Communicate well and be an efficient and responsible team member

REQUIRED EXPERIENCE, KNOWLEDGE AND SKILLS

- Extensive full-time development experience (2+ years)
- Knowledge of HTML, React / MobX (Redux)
- Solid knowledge of foundations of JavaScript/CSS
- Ability to write functional and modular code that will be supported for a long time
- Being flexible and able to adapt to new requirements quickly
- Desire and ability to work remotely with daily video calls
- All written communications in English

WOULD BE A PLUS

- Knowledge of internet stack: HTTP, Linux, Nginx/Apache, Node.js
- Experience with one of the JS server-side scripting frameworks (Nest.js / express / koa or similar)
- Experience with e-commerce integrations (Shopify, Magento, Woo)
