

MRUSD will no longer be reporting positive COVID cases in and out of schools due to canceling of requirements for testing and contact tracing in educational systems, effective January 24, 2022.

The VT Dept. of Health's dashboard can be found [here](#).

Maple Run COVID-19 Case Update

In order to be as transparent as possible, we are changing the way we report Covid cases.

The below tables display the 2021-2022 and the 2020-2021 school year separately. We are now reporting cases while contagious in-school, and those associated with our school who have reported to us that they have tested positive although they were never in a situation to infect others while in our buildings. Keep in mind these can only be reported here when we are made aware of them. This data includes students and staff. It is updated as the district is notified of cases - new cases are added to "this week" as received, then combined with cases since Last Friday on Friday afternoons.

YTD In School cases since Last Friday = Total cases contagious while in school as of the last Friday.

YTD Outside of School cases since Last Friday = Total cases reported to us that were *not* contagious while in school as of the last Friday.

In School cases since Last Friday = Cases Sat. thru Fri. since last Friday.

Outside school cases since Last Friday = Positive cases reported to us that were *not* contagious while in the building.

Total cases = All reported cases this school year.

2021-2022 School Year

School	YTD In School Cases through last Friday	YTD Out of School Cases through last Friday	In school cases since last Friday	Outside school cases since last Friday	Total Cases
BFA/NCTC	68	78			146
CP	0	0			0
FCS	30	11			41
SACS	44	6			50
SATEC	85	61			146
District	227	156			383

2020-2021 School Year

School	In School Cases	Out of School Cases	Total Cases
BFA/NCTC	17	39	56
CP	0	0	0
FCS	5	6	11
SACS	9	12	21
