

SJSU GenAI Assignment

Create a media-based artifact (infographic, video, slideshow, audio presentation, etc) from your research and explorations of your community's use of emerging technologies. How do they use technology to advance the community or share information? Flex your creativity with an artifact that conveys what you learned about your community's use of technology.

Students can also use Generative AI to build an infographic. It is optional. Their infographic may focus on:

- your information community as a whole
- your community's use of emerging technology
- one of your earlier blog reports
- a major course assignment
- your literature review notes or try uploading your Literature Review Matrix
- an outline of your research paper
- another aspect of your research that helps explain your community

Your job is not just to generate an image. Your job is to evaluate whether the infographic actually represents your research well. Think about accuracy, emphasis, clarity, and connection to INFO 200 concepts.

Along with the infographic, students should include a short memo that explains their decision-making process. Their memo should address the following:

- what you chose to highlight from your research and why
- how your choices connect to course concepts or frameworks
- what you left out and how you made those decisions
- the prompt you used to generate the infographic
- any revisions you made to the output
- a short reflection on the experience of using AI for this kind of synthesis
