Homework 2: Codecademy Ruby Course

The goal of this homework is to ensure that you have a modicum of proficiency programming in Ruby. To accomplish this goal, you must complete Codecademy's online course on Ruby:

http://www.codecademy.com/tracks/ruby

At the time of writing, Codecademy estimates the course to take 9 hours to complete.

After you've completed the course, you must do the following, so I can confirm your work:

- 1. Make your Codecademy profile public (under "Account settings", make is so "Everyone" can view your profile).
- 2. Submit the URL of your Codecademy profile page (by following the "View my profile" link). Use this form to submit: http://goo.gl/forms/9yN1sS4JG0.

Note that your profile page must list "Ruby" under your "Completed Skills". If your page does not list this, then you have not fully completed the course.
