

Russian forces seized control over the Chernobyl power plant are holding the staff of the Chernobyl facilities hostage. This could affect the routine efforts to maintain and protect the nuclear waste facilities and can result in another ecological disaster.

This is a radiation threat for the whole of Europe! ☠️ Let's gather the international community against Russia right now, and show the world that it's not just about Ukraine!! These are things you can do:

- Go out to the streets of your city and demand tough sanctions on Russia. Arrange your own event with relatives and friends and register on the website:  
<https://www.stopputin.net/>  
If this is not possible - write to all possible state institutions and demand actions from your deputies.

What to require:

- The maximum number of weapons for Ukraine. That is very difficult but extremely important. You must demand from them to cover Ukraine from the air, at least from Russian missiles.
  - Toughest economic sanctions, including the disconnection of Russia from SWIFT and trade embargo, and Russia's complete isolation.
  - Immediate imposition of personal sanctions (ban on entry and blocking of assets) against all Russian oligarchs, including Putin personally (more on the tag #BlockPutinWallets)
  - Allocation of maximum financial assistance to Ukraine
- 
- Register and invite your friends to register in the list of Ukrainian activists abroad and wait to be coordinated:  
<https://bit.ly/36FzxUz>

While the Armed Forces of Ukraine are now doing everything possible to protect us, sanctions are our weapon. If Western politicians do not dare to take the toughest of them now, they may never dare. In order to preserve Ukraine's nationhood, it is now important to put maximum pressure on them.

Set up a contribution to Come Back Alive (<http://savelife.in.ua/donate/>) or the official account of the Armed Forces of Ukraine: UA843000010000000047330992708

We will definitely win. But we must not watch - we must act!
