Minsk, 2021Q2

Candidate requirements

At the Arlo project we do very intensive IoT stuff, so we have to visit the office, we work with real cameras and base stations. Due to that reason this Internship program will work for you only if you are able to visit the office, at least 4 days a week (at least 6 hours a day).

On other projects you may have a full remote position, but only after Internship is successfully completed. Should be discussed separately with project leads.

So, our minimal requirements to candidates:

- Good confidence in QA theory and terms
- English level, enough for work with documentation - higher level you have - better chance to get onboarded
- Basic Python understanding, any background in Computer Science
- Ability to write simple programs Python
- Passion to technology, Linux, Shells, Networks is a big plus
- Advanced Windows or Linux or MacOS user is a big plus
- Good knowledge of Android or iOS platform is a big plus
- Understanding how to use Chrome developer tools
- Understanding of basic Networking/Internet
- Bachelor degree in Computer Science is a big plus
