## Agenda/Note

- Features
  - Releases
  - Backlog
  - CI/CD
  - Add a note for the capi images used - Prajyot
  - Check UT coverage - lets create an issue to increase the %
- 
- Retrospect v0.11.0 release on what went well, what could have been better and what were the blockers [Anshuman]
    - Review process can be a little quicker
    - AI - Setup PR review Meeting
  - [Varad]
    - Enhance scripts to setup CAPI cluster.
    - AI - Please create the github issue with all the issues faced
  - [Shilpa]
    - Testing is tedious - Time consuming, Destroy flow takes a lot of time.
      - Revisit delete cluster flow in case where image import has to be aborted while in progress - can we request the cloud team?
      - AI - talk to PowerVS team to understand the delete workflow for the image
    - Some documentation related to the issue - Scenarios to cover/test to be added to the description of the issue. Include a test-scope proposal.
      - AI - create feature template with all the information
        - Scope, testcases etc..
  - [Dharaneeshwaran]
    - Improve UT coverage with different scenarios.
      - AI - create an issue to increase the UT coverage
    - Add comments for API spec.
      - AI - lets enhance the API spec - revisit the current API comments
  - [Amulya]
    - Please help with documentation, as new contributors tend to follow the guides religiously. Any gaps in the documentation can be elaborated if there are any helpful steps that are missing.
    - Need to revisit the code & design
      - AI - Create an issue to look at the overall design
  - [ Manjunath ] - Increase the UT coverage

## Agenda/Note

- Features
- Releases
- Backlog
- CI/CD
- [Karthik] Should we validate ibmpowervscluster.spec.network.name like id and if set and not found fail the reconciliation?
  - Keep as is now, need a separate meeting to discuss about setting type of network a well.
- [Karthik] Should we clean up the old CAPI images from cos-buket?
  - Yes, Add a checklist in github template to clean up the images once the new image is built.
- [Karthik] Multi zone workspace support, We will support only multiple zones within a region. Avoid multi region or within a zone multiple workspace.
  - Allow as is.
  - Dont add any restrictions
- [karthik] Should we support tagging with feature gate or integrate to existing flow but silence the error
  - Create an enhancement for tagging, think about supporting user provided tags
  - Support creating tags first.
