

Welcome to the best, most caring and personalized online K-2 and 3-5 grade programs a parent could find when searching for one that could best serve their primary aged child! One that offers small class sizes, individualized attention and ongoing one-on-one advising and mentoring offered to both your child and to you the parent, whom we like to refer to as the “learning coach.”

Here is a quick glimpse into our K-2 and 3-5 grade programs:

Structured, consistent school weeks:

- Monday virtual weekly check-ins to get off on the right foot
- Tuesday in person classes full of a variety of core subject lessons (STEM, ELA, Social Studies) as well as Art, brain breaks, song, body movement, outdoor recess activities and most importantly serving your child’s social and emotional needs
- Wednesday new parent orientations, and Friday advising and mentoring as well as assistance with school work, virtually, which is something your child can count on any time as we are available by appointment most days of the week
- Thursday virtual classroom, which expands but also provides some repetition to deeper learning of Tuesday’s concepts learned at our in person class

Our curriculum: “Accelerate Education”

- A mixture of video and text with interactive activities covering the core classes: Math, ELA, Science and Social Studies, as well as enrichment through Art, PE and other electives.
- Printed workbooks and activity sheets
- A mixture of lessons, assignments, quizzes, projects, discussion boards, etc
- A platform that provides the ability to communicate for the student as well as the “learning coach” with the teacher and to receive frequent feedback.
- An ability to personalize the curriculum in a way that best serves your child’s needs
