

Bio:

Renee Murphy is an environmental scientist and Director of Business Development at Intrinsyx Environmental, where she helps lead projects in endophyte-assisted phytoremediation across the U.S. and internationally. She has spoken at two international TEDx events, served as keynote speaker at NICOLA in South Africa, and regularly presents at U.S. and global conferences on sustainability and phytoremediation advancements. Her work blends science, storytelling, and sustainability—drawing on a background in luxury fashion, marketing, and environmental science. She earned her B.S. in Business from the University of Southern California and an M.S. in Plant Science from Cal Poly Pomona.

Beyond her role at Intrinsyx, Renee teaches sustainable gardening classes at Western Nevada College.

She is building a speaking career focused on inspiring corporate, community, and global audiences with lessons from nature's circular systems and the synergistic power of plants and microbes to restore balance to our planet.
