

Where is Clean Water Power Around Me?

Name _____ P ____

Type of renewable energy I am focusing on: (Circled one)

Hydro Power

Wave Power

Off-Shore Wind Power

Procedure: Use the internet, teacher provided links or handouts to answer the following questions.

How does your assigned clean energy work? How does it generate power?

What are the considerations that need to be made on where to place these power generating devices?

Looking at the websites or handouts, what areas of North America are best suited for your type of power generation?

Based on the websites showing actual sites, where are the ones closest to your school?

Use the provided key to mark the location of the sites in North America and the location of your school.

Hydro Power	X
Wave Power	O
Off-Shore Wind Power	*
