

Scopes:

There are two types of scopes on The Mining Dead - The regular scope (primarily used for sniper rifles) and red-dot sight scopes. Both of these scopes are attached the same way. **Note:** *You can only scope a gun if it doesn't already have a scope. Below is a screenshot of how you can tell if a gun is scoped or not.*

1. Find a scope. You can either find one in a chest or buy one from Daryl in a safezone.
2. Find a gun. You can loot for it, or buy it from Rick in a safezone.
3. Hover over the scope and ensure that the gun you have is compatible with the scope.
Below is a screenshot of each of the scopes with the compatible guns below them.
4. Open your inventory and place the gun and the scope into the crafting square. A scoped version of the gun should be the outcome. Place the scoped gun into your inventory.
