Student Chromebooks at Home

Welcome to your new Chromebook! Your Chromebook will work at home the same way the Chromebooks work at school with just a few changes....

This Chromebook may need to be charged once you get home. When you turn it on, the Chromebook will ask about connecting to your wifi. Choose the name of your wifi and type in the wifi password if needed.

You will log into this Chromebook just as you do at school with your account: firstname.lastname@gorhamschools.org

If you have not logged into your gorhamschools account before or, If you do not remember your gorhamschools account password, **Please contact your teacher who has a list of their students' accounts and password.**

The first time you log in, the Chromebook will _"automagically"_ update some settings, so that the next time that you log in, and for the time you have it at home, it will remember your account name for you. You will only need to type in your password.

A word of caution – PLEASE DO NOT change the settings that are in the bottom right corner. Changing to the International keyboard will prevent some chromebook features from working the _way_ you need. Changing Accessibility settings will make things not work right, as well, So, stay out of that Settings box!

Remember – Keep food and water and liquids AWAY from the Chromebook, just as we do at school. If you need to clean the chromebook, shut down the Chromebook, spray a cloth with a general purpose cleaner and wipe down the Chromebook, not drippy wet.

Your teacher can answer questions about your lessons and about Google Classroom or Seesaw. They can get in touch with Mrs. Gauley if you have a problem with the Chromebook. Also, you can contact Mrs. Gauley or email Tech Support <techsupport@gorhamschools.org> or call the tech support line: 207-222-1188.

We are here to support you!

Thank you,
Joanne Gauley, Technology Integrator
