Israel "pulling" US into its grand visionary War With Iran

- *Israeli media reports the Pentagon will deploy American soldiers to operate the THAAD anti-missile system, which would make the US directly involved in any Israeli attack on Iran. The Pentagon denies such a decision has been made, but the move is under consideration.*

So what would be the purpose of US personnel operating an extremely expensive system which Israel already possesses, and which Iran apparently foiled in its latest retaliatory attack? It seems the Biden admin is on the verge of turning US troops into human shields for Israel, exploiting their presence to prevent Iran from striking near their strategically significant locations, as it seeks to limit direct US involvement in the conflict.

American soldiers therefore become human tripwires as well, as any US casualties would trigger calls in Washington for an all-out US war on Iran. And that is precisely what Netanyahu has been angling for since he returned to the PM's office 15 years ago.
