

How to get the insta360 Media SDK

1. Go-to <https://www.insta360.com/sdk/home> or google search "insta360 SDK"
2. Follow the guide to submit a request and the NDA with your handwritten signature, and the Linux SDK is the only one you need here.
The "Serial Number" can be found [by this instruction](#) or in the insta 360 mobile app when you connect to your insta camera. remember to type it all on the screen if you check it on the camera.

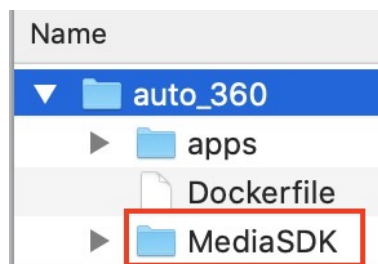

* Please select the SDK(s) you are applying for.

☐ Android SDK ☐ Android Live Streaming SDK ☐ iOS Live Streaming SDK ☐ iOS SDK ☒ Linux

☐ Windows

3. Wait for approval (may need a couple of work days) and download the linux SDK
4. unzip the "Linux_SDK.zip" and you'll get the "Linux SDK" folder, there are 2 folders, only the "**MediaSDK**" is what we need
5. **move** this folder under the folder you downloaded from git like:

6. You are done with this subtask :)
