

Confirmed On-Site COVID-19 Case Dashboard

EUSD will report all confirmed COVID-19 cases among personnel and students physically present at district schools and facilities during their infectious period for COVID-19. The infectious period begins two days before the onset of symptoms. If the case did not have symptoms, the infectious period is considered to be two days prior to the testing date. Note that personnel includes contractors, substitutes, and others working at EUSD schools and facilities.

WHAT'S NOT REPORTED

The District will not report cases of students engaged in 100% independent study or cases that occur during school holidays, travel, or other circumstances where the COVID-19 case was not present at a school or district facility during the infectious period. Additionally, community cases among individuals or groups using a district facility when students and staff are not present are not reported. For confidentiality purposes, names and identifying information are not reported, and students and staff cases are reported together in a single category.

DASHBOARD UPDATES

The dashboard will be updated within 24 hours of the District learning of a confirmed COVID-19 case when that occurs on a Monday – Thursday. Cases reported on Fridays and weekends will be added to the dashboard by the following Monday.

CONFIRMED ON-SITE POSITIVE CASES FOR 2021-22 SCHOOL YEAR

Month	Anna Yates Elementary School	Anna Yates Middle School	Emery High School	District Office
August 2021	0	1	2	0
