

Year 7&8 Chromebook Expectations of Care and Use

We are very fortunate to be able to use Chromebooks as a tool for learning. This means that we must ensure that we have a shared understanding of how to properly care and use these devices as they will be used by other students in the years to follow. These devices are a privilege and we have to make sure that we appreciate this and not take it for granted - the school owns them, therefore, they must remain at school at all times. These Chromebooks are a **tool for learning** and will not be used for social media reasons at any time throughout the year. Our Internet safety agreement is a document which outlines our expectations of care and usage. It is expected that all students will unpack, read and sign this document to say that they will be responsible users of both the devices and the internet.
