FTC#20294

Note your time and speed results here:

Time (in milliseconds)	Speed (0-1)	Distance Traveled	Notes

Do you need to compensate to drive straight? If so, first try going your longest distance (3 tiles or so) then increase or decrease one side by 0.01 increments. Note if this makes driving straight better, worse, or the same

Left Motors Speed	Right Motors Speed	Difference	Better/Worse/Same
