

Backlog Organization Categories

Priority

- Feature requests that will be spec-ed out and assigned to future sprints
- Bugs that need to be addressed for critical or normal functionality
- Questions that can be answered easily
- Projects that are already underway or scheduled

Potential

- Feature requests that are potentially useful for many libraries
- Mid level bugs that should be addressed but don't affect critical functionality
- Questions that should and can be answered but aren't critical
- Projects that would be beneficial for many libraries and could be scheduled

Perhaps

- Feature requests that would be nice but may not make much improvement for many libraries
- Low level bugs that would be nice to clean up but don't affect anything important
- Questions that need investigation to answer
- Projects that might be useful but don't improve functionality for many libraries

Pasture

- Feature requests that are not possible or will not benefit more than one library
- Questions that cannot be answered
- Projects that are obsolete
- Any other obsolete issues - likely things older than 3 years, but this is not a rule of thumb
