Bleacher Request Approved for # Bleachers _____

PORTABLE BLEACHER FAQS & FEATURES

1. How many bleacher units are available and how many units can be booked for an event?

There are a total of 4 sets of hydraulically deployed portable bleachers. There is no limit on the number of bleachers that can be booked. The determining factor is availability.

2. What is the seating capacity?

Each bleacher has 9 rows but actual capacity varies based on the age, size, and spacing of people. An estimate would be approximately 150 people.

3. What type of location is required?

The bleachers should be positioned on a firm, reasonably level surface and are ideal for almost any park or parking lot setting. The total weight of 7,000 pounds is distributed on eight 7' X 10" jacks. The bleachers require a minimum of 60 feet clearance and maneuver space in order to be installed. Leveling jacks are provided for final bleacher leveling and support.

4. Is there a damage deposit fee charged?

A \$250.00 damage deposit is required for each unit for all users. The deposit, required at the time the bleacher booking, is returned in full to the user, upon expiration of the User Agreement as long as the bleachers are returned in a condition satisfactory to the Yarmouth County Agricultural Society.

5. What are the dimensions of the bleachers when open?

Length 39 ft but 46 ft 9 in (with hitch), Width 17 ft 9 in and Top Seat Height 7 ft 5 in.

General Information Regarding the Bleachers

- The Mobile Bleachers are a self contained seating system capable of highway transport and fast setup.
- Bleachers do not require latches or support pads to be positioned for transport.
- Bleachers have a constant, standard seat slope for safety
- Bleachers unfolds to offer 9 row bleacher seating with guardrails. Guardrails fold and unfold with the main bleacher structure, and do not require additional assembly or latching.
- Bleachers are equipped with a self contained hydraulic actuator, permitting fast, one person setup.
- Bleachers have a rugged, galvanized steel support structure with aluminum seat and footboards. Weather resistant materials and components were used throughout.
