TITLE OF STUDY (MAXIMUM 15 WORDS)

First Author[1*], Second Author[2]

Affiliation of all the authors[1,2]

Corresponding author email[1], co-authors emails [2] (Institution Email Suggested)*

Abstract

In no more than 250 words, your abstract should be written and divided into the following points:

Purpose: In simple words, tell to readers about the aim of this study. No discussion, no story, only aim of this study

Research Methodology: Give name, brand, type of tools, methods, software, review, and survey that have been used to do this study. No discussion or explanation.

Results: Write only main results in few words. No discussion or explanation.

Limitations: Write a brief limitation of the study

Contribution: Where this study can be useful? Give the name of area, disciplines, etc.

Keywords: Keyword 1, Keyword 2, Keyword 3, (maximum 6 keywords)

Please note that your manuscript should be:

- **5000 – 10000 words**
- **11 pt Cambria font**
- **One space**
- **Normal margin**

1. INTRODUCTION

Provide background of the study in easy words. In this section author should discuss the research problem in very clear words. Also discuss the motivation of the study. Provide in-text references in APA style for all the facts that are presented here.

2. LITERATURE REVIEW AND HYPOTHESIS DEVELOPMENT

Related work of previous researchers should be presented. Minimum 10-15 good and recent works should be presented. This section can be merged with introduction section as well. Here

author can discuss the research gap that this study is going or willing to cover. Provide in text citation in APA style, e.g. (Harris, 2001). For more detail guidelines of Citation please visit: https://aut.ac.nz.libguides.com/APA6th/intextcitation

3. RESEARCH METHODOLOGY

Present the materials, methods, survey, questionnaire etc. used for the study. Author should explain whether this study is experimental, or review study, or simulation based or survey based. Discuss software, hardware's used during study with their brand names. Mention all research conditions, assumptions, theories followed. This section should be easy enough for any reader to repeat the study under similar conditions.

4. RESULTS AND DISCUSSIONS

Provide logical, and scientific analysis of findings of the study. Present evidence to support your analysis by citing work of earlier researchers or existing theories.

5. CONCLUSION

Conclusion should be written in very clear words. It should explain how the objectives of the study are accomplished.

LIMITATION AND STUDY FORWARD

No study covers all aspects of the research problem. Author should discuss the limitations or gaps of this study. And also, present future scope or plan of the study.

ACKNOWLEDGEMENT

Author should present a list of acknowledgments at the end. Any financial or non-financial support for the study should be acknowledged.

REFERENCES

1. All references should be in APA style and presented inside the main body of article.
2. You should attach at least 15 references.
3. Every in-text citation should be hyper-linked to reference
4. References should be in the last decade.
5. The use of primary sources for the references is strongly recommended.
6. Using the application/software for referencing such as Mendeley, EndNote, and etc. is strongly recommended.
7. All references should be mentioned inside the article in the form of In-text reference.
8. Reference list entries should be alphabetized by the last names of the first author of each work.
9. Journal names and book titles should be italicized.
   Eg. Li, S., & Seale, C. (2007). Learning to do qualitative data analysis: An observational study of doctoral work. *Qualitative Health Research*, *17*(10), 1442-1452. https://doi.org/10.1177/1049732307306924
