

How to customize the blog colors on Wix

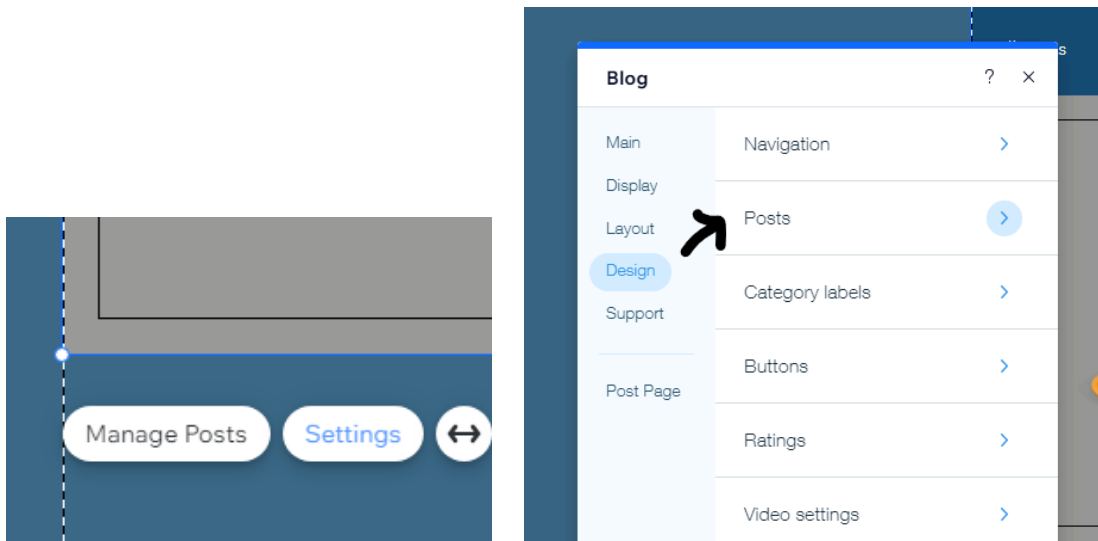

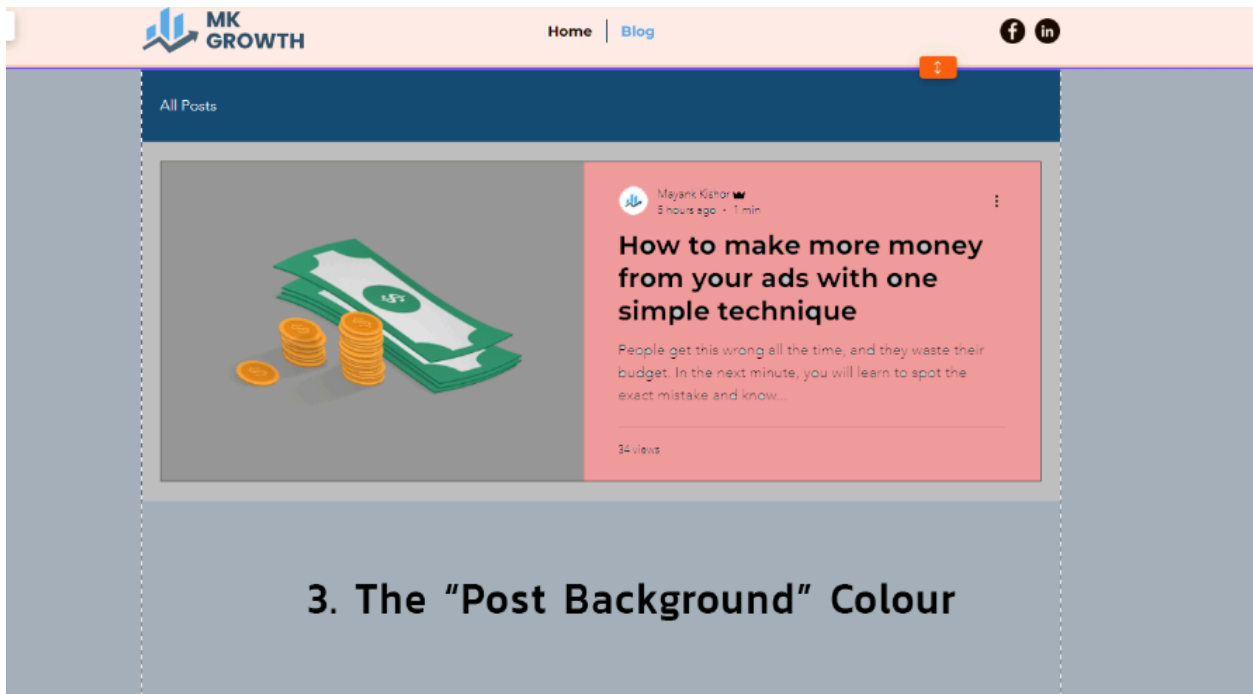

1. To change the background color of the entire page, click on it and you'll see the "Change Background" option. Then pick a color/image of your choice. Pretty Simple.

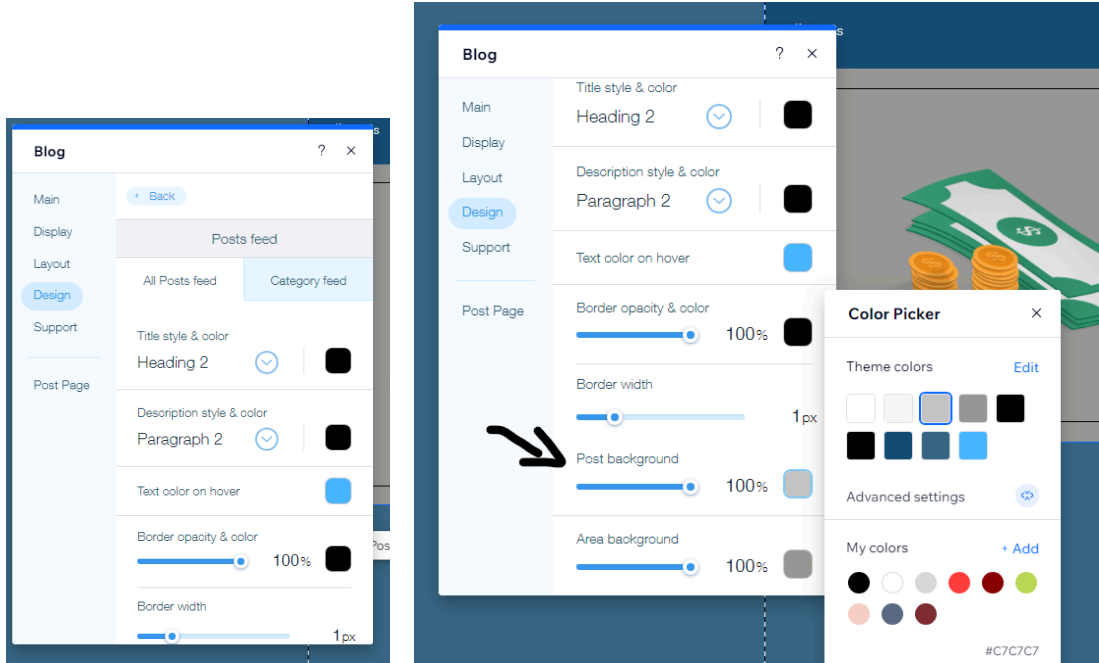

2. To change the area background, click on the blog, go to settings, select design, then click on "Posts".

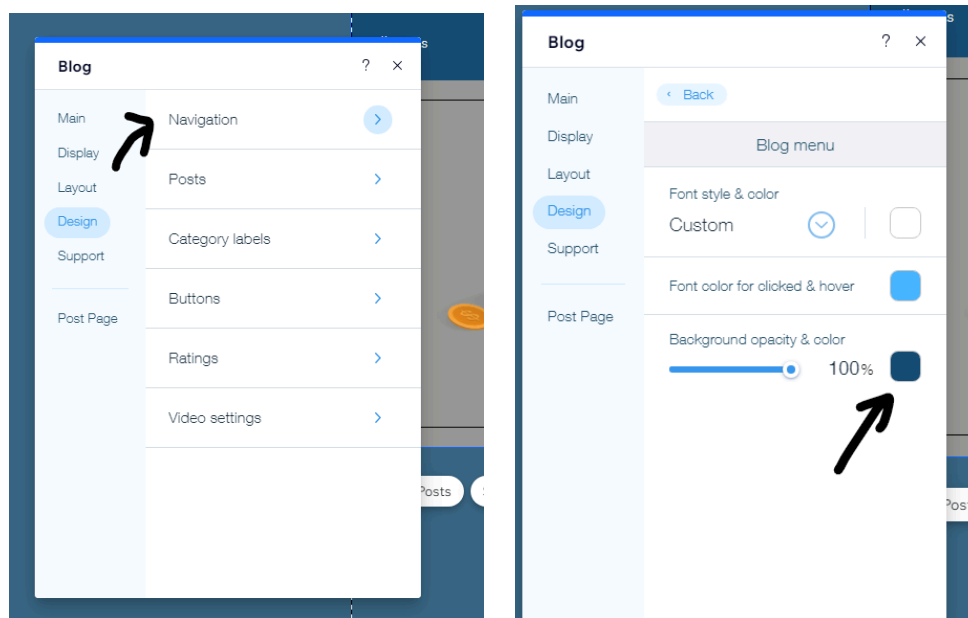

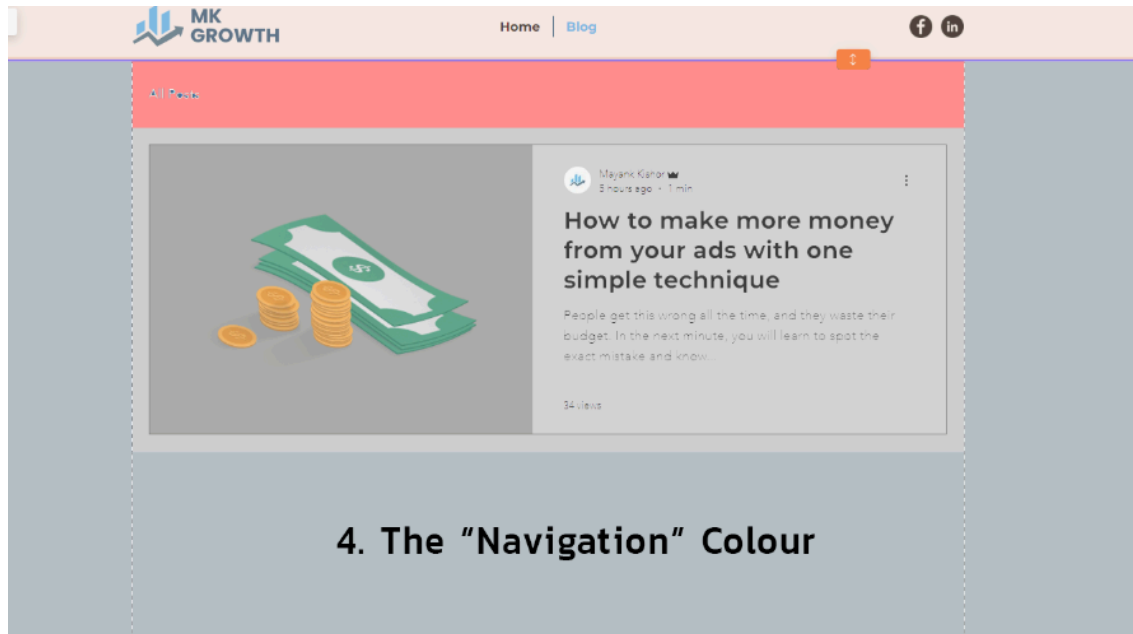

Scroll down till you see “Area Background”, then you can either make it transparent or choose your color.

3. To change the "Post Background" color, it's the same as the previous one. Click on the blog, go to settings, select design, then click on "Posts".

Scroll down till you see “Post Background”, then choose your color.

4. To change the "Navigation" color, it's the. Click on the blog, go to settings, select design, then click on "Navigation". Make it transparent or pick a color.

- Changing the colors of the text and hover colors should be easy, it's within the same menus.
- You can then choose how much you want to display in the "Display" section.
