Imants! I'm so glad I met you at the beginning of freshman year. You're funny, super nerdy, and inspiring with your dedication to jazz. I can't wait for two years of Jazz 1 with you!! - Ben F.

Hi this is Amanda! Hope you like comic sans. Welp, we didn't have any classes together but I found a picture of you from last year in chem with a frog (A VERY CUTE ONE) next to your arm!! Good times. Easier times. Can't believe we just finished AP chem... that's pretty wild. Anyway, your epic (and intimidating) Jazz skills, fedora, ponytail, sense of humor, and nerdiness make for quite the memorable character! If the schedule-making gods smile (or frown... I guess it depends) upon me maybe we'll have a class together in the fall. Try to have a good summer, see ya "next year"! -Amanda K.

LOOK AT HOW CUTE THE FROG IS

oh also

Hi Imants!
It's been great to know you this year! You constantly surprise me with the creative ways you find to keep music interesting. (And yeah, I'm mostly referring to the rubik's cube. Iconic. Speaking of which, you're gonna have to teach me how to play a low A sometime, I tried it once and it just Did Not Work. Is it even possible on alto? Idk. Aaanyway.) You really are a great musician, and I admire how hardworking and committed you are. I'm excited to see you in jazz next year!
-Clio

Imants! I wish we had classes together this year, first year Chem was so much fun with you last year! It's sad how little I actually know about you :(We better have at least one class together next year! Thank you for being so friendly and always taking one of my many baked goods off of my hands. Have a fantastic summer! -Ella H

Hi imants!
I do not think i talked to you at all this year. Tis a pity! Perhaps next year we will have classes together. However, freshman year chemistry together was very fun and i have many fond memories from the class! I still think that metal cube you made is very cool. And thank you for letting me borrow your fedora for my language arts production of romeo and juliet; the scene wouldn't have worked without it.
You speak latvian right?
lai jums lieliska vasara!
-sidonie

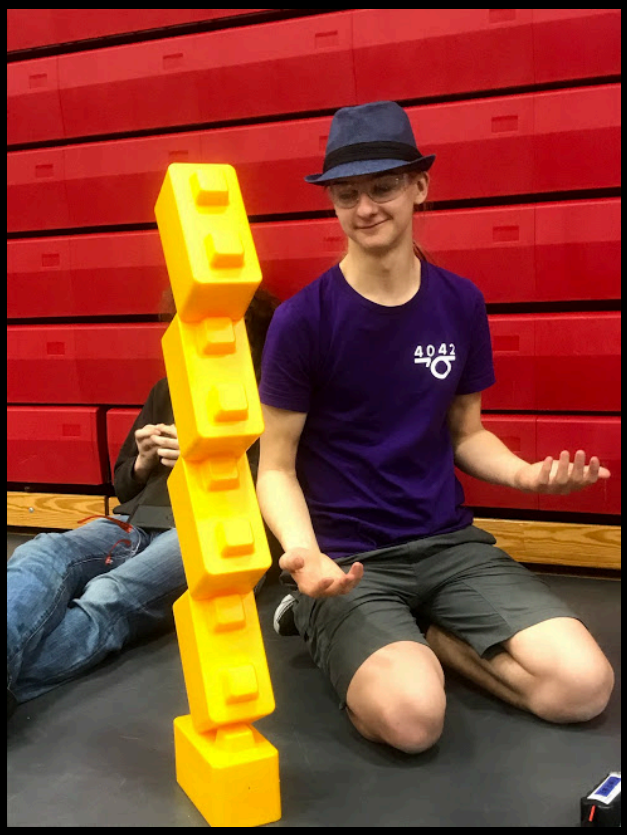

Imants - Freshman year LA was a blast! I really wish we had a class together this past year but I bet we will next year! I love how you are not afraid to speak your mind and contribute to classes. You are always so kind and I hope you have a great summer! - Hope

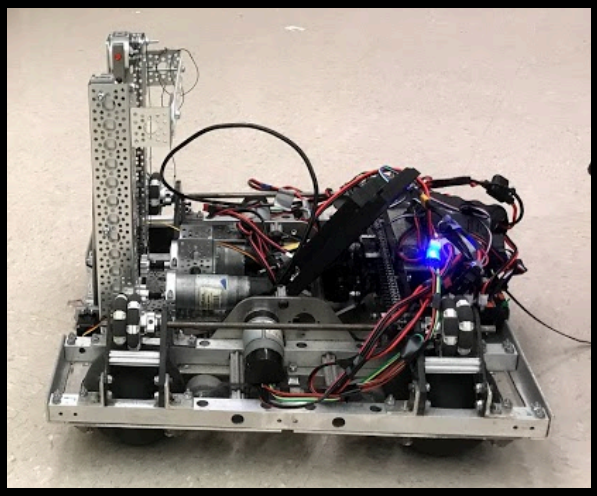

Boa me na me mmoa woa

I miss ya Ee-monz - Nathan Snow

Hi Imants! It's been great getting to know you this school year in robotics! You are nice, funny, smart, devoted, and inspiring! You always bring a positive attitude and a lot of energy to the team, and your mechanical skills have been invaluable for our robot! Also, you are creative and innovative, and I accredit you with being the driving inventor that won us the Innovate award at interleague. I admit that I did not initially have much confidence in the feasibility of a suction cup (I thought it would be too weak); however, you've shown me that in order to get new ideas to work, you have to invest in them. And to the delight of everybody, your idea and its implementation proved to be absolutely amazing! Below are some photos of this awesome year in robotics. I am looking forward to seeing you again in the future!
-Kai ^_^

P.S.: Nice dab :-)

Hi Imants! Thanks for always having my back in our classes together, you definitely saved my grade in history this year a good few times. Talking to you about D&D or music or other assorted geeky things is always a great time, and I hope we have some classes together next year so we can keep it up! If I stumble across any more long-lost yearbooks, I'll send them right over. Have as great of a summer as possible!
-Iris
