The Milkmaid v0.8.1 interaction guide by Mr. JeanGobax (game DEV :p)

important variables for the game

-lust (only alters Yumi's heat)

-nymphomania (changes her behavior to that of a whore who loves to be penetrated)

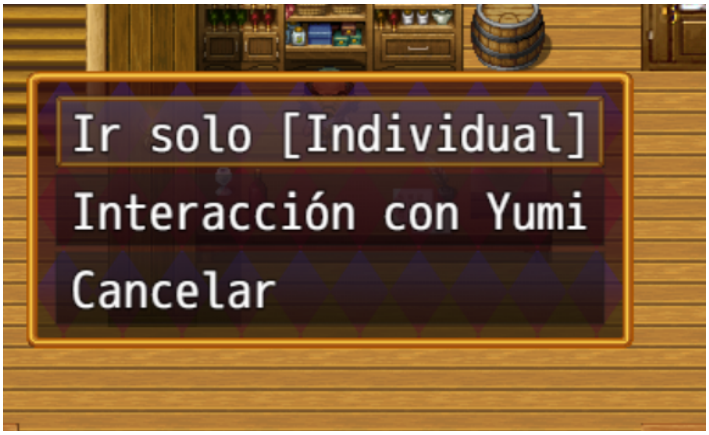

-love (it is the love he has for the protagonist)

Virginity (you only lose it if an explicitly vaginal sexual event occurs)

NTR (if you turn it on, Yumi will be able to have sex with other men)

In the menu when you press “states”, you will see
the times that yumi has had sex, if yumi has had 0 vaginal sex [pussy] she is considered a virgin

Now, if you have too much vaginal sex you can get her pregnant…

-If you press the “W” key, an interactive menu will appear when they are together (if they are not together, it will not appear)

-Here you can decide if you are together (meaning you can play individually with Yumi or Jamie)
-practically in NTR OFF mode, there will be almost no erotic events with yumi unless are boyfriends (that is, talking about the protagonists)

-Here you will see the option “suggest a date”, it will be a linear event where it is decided whether you are a couple or not
-Conversations are random, they vary depending on whether the NTR is active or not, or if “Jamie is a cuckold”

Introduction

In the introduction of the game you define the game variables according to the interactions,If you skip the intro, it will simply default to love = 100 and lust = 50.

If NTR is ON you can set the nympho variable to the maximum (which completely changes the intro and story depending on your actions)

Bed, Time System and Sexual Event with Jamie

To have sex with Jamie you need to be together and be a couple (press the W key and "suggest a date" and you become a couple) you can have sex either in Yumi's room or in Jamie's room.

Chimney

-If you want to cheat, there's a "wishing orb" in the fireplace. To extract it, you need to play with Yumi individually and press the fireplace until it releases the object...

Stepfather

Jamie's stepfather can lend you money (if it's the NTR version, it will be charged by having sex with Yumi after lending her $2,000), you can also talk to him, if both of you are together you won't be able to enter his room, except for Yumi who will be able to enter
It doesn't matter if it's NTR OFF ON, the difference is that it won't be able to trigger any events...

(if nymphomania is greater than 200 the interaction will not work because it is not yet implemented)

The inn

In this inn, as in all maps, there is a day and night cycle.
So if you are playing individually with a protagonist, he will go to sleep in his respective room.

The stepfather will also go to sleep when it is night.

at the moment it is quite empty…

adventurers' guild

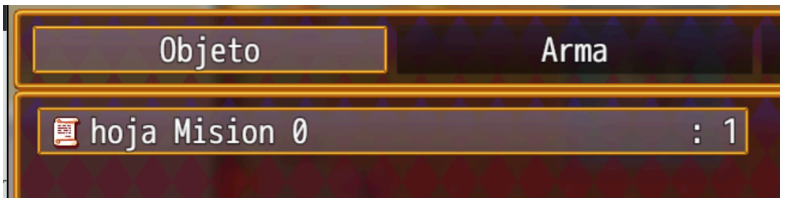

It is located in the center of the capital
If it's NTR, there will be an event featuring "NAVIL", Jamie's childhood bully,I'm planning on screwing him up on some missions...

Once you get in you have to talk to the person at the counter and ask to be an adventurer.

This woman will ask you to "fill out a form" and then send the protagonists to hunt 5 deer and bring her their venison.

(none of this will activate if Jamie and Yumi are not together)

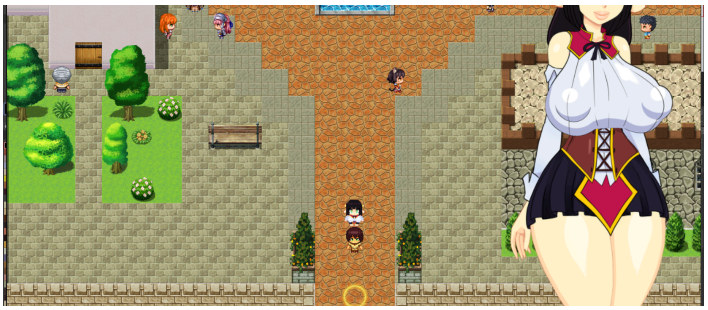

Every time you do a mission it will release you
a leaf item that briefly describes the quest to you

At the moment there are 5 but

Let's look at them in more detail…

Missions

For the deer hunting mission you have to go to the outskirts of the capital (change the layout of the capital of Benzehenia)

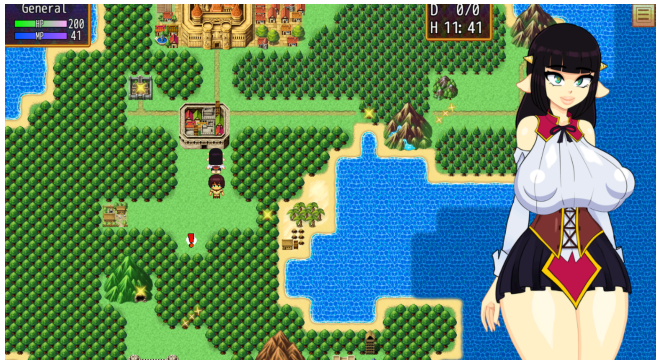

Well, you head south and head out towards "the outskirts of the capital"

Once you leave, continue straight ahead.(don't go wandering around the well,
It's a testing site for me, in fact it even asks for a password)

The minimap is quite extensive, if you see an exclamation point go towards it

Kill all the deer you see around, you don't need to go deeper into the forest, just kill them and return to the guild,Don't eat the venison that appears in your inventory.nothing will happen if you don't eat it, it just won't activate...

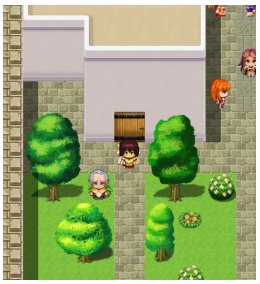

The event where the guild girl gives you your license will not be activated,Because you literally have to bring him the venison!you kill by pressing the “space” key

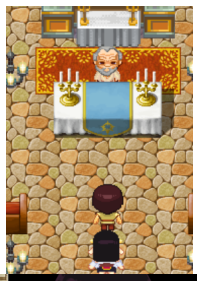

Well, after that you go back to the guild and having the venison in your inventory gives you 2 adventurer licenses(completely useless at the moment except to activate missions)

Once you have done that mission you will finally be able to do the guild missions by going to the mission table located in the upper right corner of the guild.

IT IS NOT MANDATORY TO DO THIS!, you can really do whatever you want within the game, but I am telling you in detail what you should do if you want to know more about this

mission 1

-go to church for holy water and consume the holy water you “bought”

-On one side of the inn is the haunted house, there will be a man standing at the door, interact with him to let you do the quest.

-Once you finish killing ghosts, talk to the man who asked for the assignment again and go to the adventurers' guild.
to talk to the guild girl.

She will always give you your rewards, imagine that those who make the request for the commission leave the reward money to the guild so that their newsletter can be published.

mission 2

This girl lost her kitten, it's on the outskirts of the capital among the trees, to bring her the cat you need venison
that is in the forest, go get some meat, feed the cat and take it to the girl and go to the receptionist so she can give you your reward...

mission 3

You have to kill the chupacabra, but it only appears at night on the farm, it sleeps inside the old man's house, there are beds to sleep in and an event in the stables, and once you kill it you can claim the reward at the guild

mission 4

Go to the cemetery, it is located north of the capital and will take you to the minimap…
Go to the center left corner, there is an event where you get a key.buy a shovel or you will lose 20 hp

You will find a place in the middle of the cemetery with a door, you go in there and you go deep into the dungeon without dying.

You take the treasure, that will be the reward from the adventurer's guild, that's all...

Mission 5

Go to the north right side of Benzehenia capital, it will take you to “Benzehenia Trail”

New things added
You can now touch Yumi's boobs from the interactive menu (W key), more options will be coming soon.

Adventurer quest available (only when Nymphomaniac is less than 100 and NTR is ON)

If Yumi is alone, it won't activate at the moment...

The navil event is deleted
