Joshua Ondieki

ABOUT ME

Web apps & APIs | command-line | databases | CI/CD | cloud | git

I've spent years honing my skills and building projects highlighting my passion for programming. Fluent in **JavaScript**, **Python**, and **HTML+CSS**, and familiar with **Java**, **TypeScript**, and **C#**, I've developed various web-based applications and interactive command-line projects, showing my ability to think creatively and solve complex problems.

I'm a self-motivated learner who constantly seeks new challenges and opportunities to grow my skills and abilities.

I'm currently learning React Native and improving my AWS knowledge.

EXPERIENCE & PROJECTS

GRIFFIN Global Technologies, Nyeri, Kenya – *Software Engineer*

JUL 2023 – PRESENT

- Using **C#**, **Next.js**, **Java**, **MSSQL**, **Postgres**.
- Cross-functional team collaboration building projects.
- Collaborate with senior engineers and project managers in an agile environment delivering exceptional features and timely updates.
- Implement OOP principles and design patterns to create modular and scalable software systems.
- Test and debug software components using unit testing, integration testing, and code analysis.
- Participate in client and team meetings, code reviews, and brainstorming sessions, contributing ideas and suggestions for software improvement and innovation.
- Engage directly with company clients to understand their requirements.

THE Jitu, Nyeri, Kenya – *Full Stack Developer – Internship*

APR 2023 – JUN 2023

- Used **Angular**, **Express.js**, **MSSQL**, **Firebase**, **CI/CD**, and **AWS**.
- Team collaboration building projects such as project management web app, and e-commerce website.
- As a personal assignment, I built JituExchange, a lite version of StackOverflow.

test IO, Remote – *QA Tester*

JAN 2019 - Jan 2023

- Working as an independent contractor testing apps and websites.

Studio Erickss, Project

<https://erickss.com>

- A client-facing and e-commerce website for Studio Erickss' business.
- Built using Spring Boot, Next.js, AWS, and Mongo.

JituExchange, Project

<https://github.com/JoshuaOndieki/JituExchange>

- A lite version of StackOverflow built with **Angular**, **Express.js**, and **MSSQL**.

EDUCATION

The Catholic University of Eastern Africa, Nairobi – *BSc. Computer Science*

AUG 2017 - DEFERRED

CERTIFICATIONS

The Jitu, Nyeri – *Full Stack Software Developer Certification at THE Jitu*

APR 2023 - JUN 2023

SKILLS

- **Languages:** JavaScript, Python, T-SQL, Typescript, C#, Java
- **Frameworks:** Angular, Next.js/React, Express.js, .NET, Spring & Spring Boot, Django, Flask
- **Databases:** Microsoft SQL Server, Postgres, Firebase, Supabase, MongoDB
- **Tools:** Jest, XUnit, Cypress, Postman, CircleCi, Figma
- **Technologies:** AWS
