

Brief – Aerless DE Website Rebuild for Lumai

Goal:

Recreate the German website (airless.com/de) using the Figma templates and the new product images.

For all videos, just use placeholders for now.

You have:

- [Figma file with website structure](#)
 - [Folder with results from the photoshoot](#)
 - [Briefings for visual design/adjustments](#)
 - Videos → placeholders for now
-

What to do:

1. Rebuild all main of Aerless.com (or copy paste the other website you are building for us).
 2. Create new visuals based on the briefings
 3. Replace visuals
 4. Use placeholder videos in the same spots as the originals.
 5. Steal all icons from the website, or use your own icon pack
 6. Make sure links, navigation, and footer all work properly. (For links to socials, put # or empty)
-

Output:

- New Shopify website
- All images loading correctly
- Videos showing placeholders
- Text, buttons, and layout matching current /de version
