A Title is Fewest Possible Words and Describe the Content

(Title should be Clearly Defined and Informative (max 12 words); using Times New Roman (TNR) size-16 pt, single spacing, bold, align center)

Author1's Name[1], Author2's Name[2], and so on
(Authors' names without academic title, TNR size-12 pt, single spacing, align center)
[1]Institution/affiliation, city and state of institution/affiliation
[2]Institution/affiliation, city and state of institution/affiliation

Abstract
(Write the abstract in English. The Abstract should be informative and completely self-explanatory, provide a clear statement of the problem, explain the reason why this study is important to do, explain the research method used, the proposed approach, and point out major findings and conclusions. The Abstract should be 150 to 200 words in length and in italicized format. The abstract should be written in the past tense. Standard nomenclature should be used and abbreviations should be avoided. No literature should be cited, use TNR 10 pt, single space, align left for the beginning of the paragraph, and the word "Abstract" is indented. Beside that, the keyword list provides the opportunity to add keywords, used by the indexing and abstracting services, in addition to those already present in the title. Judicious use of keywords may increase the ease with which interested parties can locate our article).

Keywords
minimum 3 and maximum 5 keywords from paper (in English, TNR size-11 pt, italicized, align justify).

Introduction

The introduction should provide a clear background, a clear statement of the problem, explain the reason why this study is important to do, the relevant literature on the subject, the proposed approach, and the new value of research which it is innovation, as well as the urgency. The research's state-of-the-art is necessary to be explained within the introduction to show novelty and originality of the topic to be discussed and presented. The main text format consists of a flat left-right columns on A4 paper. The margin text from the top and left 3 cm, the right and bottom 2.5 cm. The manuscript is written in Microsoft Word, single space, Times New Roman 12 pt. The terms in foreign languages are written italic (italic). Authors are suggested to present their articles in the section structure: **Introduction - Methodology - Results and Discussion – Conclusion.** This article format is intended to provide a comprehensive understanding to the readers or colleagues on what the article discusses and delivers.

This section must present theories or concepts too (select ones in line with the focus of analysis) and/or research type to be used. Note that citation or adoption from references, such as textbooks/e-books, journals, scientific works (thesis or disertation) should become a priority. On the other hand, secondary data, such as sources from the media and/or self citation must be adopted according to previous studies. The secondary data must not exceed 20 per cent of the total references.

Methodology

Methodology comprises brief information concerning research paradigm to be applied, approach(es), method(s), and type/characteristic (please select one of them) as the leading format for your research. Mention unit of analysis with comprehensive data analysis. Meanwhile, tables and figures are presented center, as shown below and cited in the manuscript.

Table 1. ... (source: ...)

No	Age	Amount	Percentage
1.	<30	50	60
2.	30-50	25	30
3.	>50	8	10
	Total	83	100

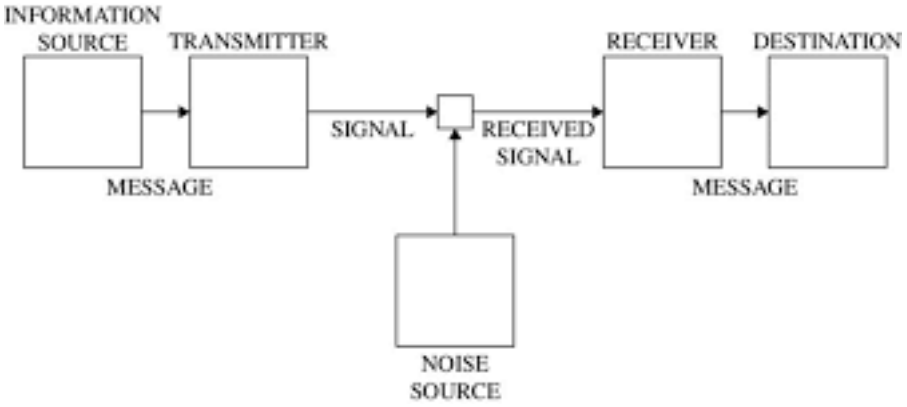

Figure 1. Shannon and Weaver's Model (source: ...)

Results and Discussion

This part presents results/findings and analysis of the findings. Figures or graphs can also be presented here to support your findings. We suggest that you mention supporting instrument(s), in forms of illustration, figure, photograph, table, and graph. Each instrument must be orderly numbered and given a title, followed by source from which you make the citation. Should the instrument is the result from the author's analysis, please write: 'source: author's analysis.'

In addition this part also contains reflection/discussion according to the research findings. In presenting the discussion, use a comprehensive explanation in order to elaborate the whole data found during the research. By doing so, you can fill gap of knowledge. Findings that rely on meaning construct tends to present a theoretical framework, so there will be an unnecessary repetition as it has been presented in the research methodology.

Conclusion

In addition to concluding remarks, this part also presents recommendation as well as implication of the finding as a whole, either intended to broaden methodological realm or to develop a theoretical framework, as such that it outreaches the users from broader societies. Moreover, it can also be added the prospect of further studies into the next (based

on result and discussion).

Acknowledgements

The authors would like thank: scholarship, funders, enumerator etc.

References

(write the references in alphabetical order).

- Citation within the text uses a bodynote.
  Minimum number of references is 15 (references published last 10 years, 80% from textbooks/e-books and journals, 20% from the secondary data).
- Authors must cite minimum two online articles of Cakra Communico: Journal of Communication Science.
- Reference writing and Citation must use reference management software (Mendeley**)** with APA Styles (Seven Edition).
  The number of pages per article should be minimum eleven pages and maximum fifteen pages include references.
