

Privacy Policy for qrBit

Last updated: April 29, 2026

Introduction

This Privacy Policy describes how qrBit ("we", "our", or "us") collects, uses, and protects your information when you use our mobile application (the "App").

We are committed to protecting your privacy. qrBit is designed with privacy in mind — we believe your data belongs to you.

Information We Collect

Information You Provide

qrBit does not require you to create an account or provide any personal information to use the core features of the App.

Automatically Collected Information

We do not collect any personal data, usage analytics, or tracking information. qrBit operates entirely on your device and does not transmit your data to our servers or any third-party services.

Data Processed on Your Device

The App processes the following data locally on your device:

Camera Data: The App accesses your device's camera solely to scan QR codes. Camera frames are processed in real-time and are not stored, transmitted, or shared.

Generated QR Codes: QR codes you create are stored locally on your device. You have full control over them and can save, share, or delete them at any time.

App Preferences: Basic settings (such as theme preferences) are stored locally using your device's secure storage.

Permissions

The App may request the following permissions:

Permission : Purpose

Camera: Required to scan QR codes. Camera data is processed in real-time and never stored or transmitted.

Storage / Photos: Required only when you choose to save a generated QR code image to your device gallery.

You can revoke these permissions at any time through your device settings. Revoking camera permission will disable the QR scanning feature.

Third-Party Services

qrBit does ***not*** integrate with third-party analytics, advertising, or tracking services. We do not share your data with any third parties.

The App may use standard operating system libraries and Flutter framework components, which operate entirely on your device.

Data Security

Since all data is processed and stored locally on your device, the security of your data depends on your device's security measures (such as screen lock, encryption, etc.). We recommend keeping your device's operating system up to date.

Children's Privacy

The App is not directed to children under the age of 13. We do not knowingly collect personal information from children. If you believe we have inadvertently collected such information, please contact us so we can delete it.

Changes to This Privacy Policy

We may update this Privacy Policy from time to time. We will notify you of any changes by posting the new Privacy Policy in the App or on our website. Changes are effective when they are posted.

Your Rights

Since we do not collect or store your personal data on our servers, there is no user data for us to access, modify, or delete. All data remains under your control on your device.
