

Shibby's LIVE Recording

(And some stuff about my discord server in general)

Here's how it works:

First off- It's free!

Well, one version of it is.

No money needed to listen, just a respect of those on my discord server, and a lust for my voice.

[You can listen LIVE on discord.](#)

or

For [patrons](#) on my Hypnoslut tier, you will often be given an exclusive link to listen to the LIVE recording in stereo sound. You can find that link in the discord channel "Patreon Live Recording", or on patreon itself.

[Here is a short video showing you how to connect discord integration with Patreon.](#)

How to Listen:

Listening is easy, I have my own discord server, and youtube channel.

You can listen on your mobile, or at your computer.

Just download discord [Here- it's a free app.](#)

A lot of people use this app for gaming... so you don't really have to worry about someone finding it on your computer so much.

And then once you've done that come to my server by [clicking this link.](#)

It will bring you to my welcome page, where I go over the rules for my server.

The main one is don't annoy me.

Once you have the rules down pat...

On the left you will see channels. Just scroll them down a bit (the scrolling down is independent from the chat box) until you find the one marked "Recording"

Click on "Recording-Channel-Chat"

Here you can check out the chat and where I announce my live recordings, and the files I will be recording. The chat is also what I am reading to interact with you guys while recording.

Once in there it's time to hop in the voice channel!

It's the one that says "Recording" with a little sound icon to the left of it. You'll probably see a whole bunch of other people hopping in there, and once your avatar is with theirs you will know you are in!

I generally join 5 or so minutes before the time I have announced to start recording, so you won't hear anything until I do.

Everyone but me is muted in my channel- so just consider yourself gagged ;)

If you want to communicate, type in the recording channel chat. I don't always answer, but there are a lot of helpful people who might.

Make sure you go into your discord settings and turn off notifications of when people enter the room.

Otherwise, you will hear a "ping" every time someone joins in to listen, which can detract from your trance or listening pleasure. Also a lot of people can come in at once, making it really annoying.

So:

1. Go to settings
2. Go to notification settings
3. Scroll down to the sounds section, look for the "user join" and "user leave" option and turn both of them off
4. Save setting and enjoy

What I Record:

I record all sorts of stuff! Everything from me playing with myself, to scripts I like from GWA or wrote myself, to Hypnosis files which will get a lot of editing later but still sound really good in a natural format live.

Sometimes I need layers of moaning, or blowjobs, handjobs, or other sounds- and a lot of times that leads to an impromptu session of me popping in the recording channel so anyone who wants to can listen in.

In case you haven't noticed... I'm a tiny bit of an exhibitionist. Having you there listening... makes it sooo much more exciting for me.

When/How often I Record:

It kind of boils down to when I feel like it.

Sometimes I will plan it out ahead of time, and give a few days notice- some weeks I even make a schedule for the weeks recording.

Sometimes I just get horny and want to moan a little and pop in and start recording with minutes to no warning.

Occasionally I see a script on GWA that is so me I just *have* to make it right away!

The best way to find out when I am recording is to keep the discord server online. I generally try to send a @everyone message before I begin recording live, so it will ping you and give you a notification.

Full schedules(when I have them) I sometimes put on [my subreddit](#).

The one issue I have with schedules is sometimes the appointed time comes... and I'm not in the mood. And I feel my best work is done when I am in a horny or topky head space.

Or lawnmowers. They are the bane of my recording existence.

When live recordings turn into edited files and I release them:

It depends. Some are simple, I can edit them in an hour or two for a finished file. Others, needing sound effects, layering, and especially hypnosis files can take up to 20 hours to fully fine tune.

Once I am ready, if the script is from GWA it is released for free, to reddit and everywhere else all at the same time. Now, GWA only allows one posting a day, and I feel my files each deserve their own time to shine, so it can take a few days to weeks before anyone sees them.

If I wrote the script, or if it was an improv, or one of the scripts someone on my patreon commissioned me to make, or occasionally a hypnosis file that took a lot of work and so the author is ok with it- than most likely it will be held for patrons only for a month or 3 before being released for free on reddit.

Why you should listen live:

Well... for one thing, it makes me happy. :)

I perform better when I have an audience, and I get off on it more recording my creations when I know you're listening.

It's also a different way to experience me.

There is something so much more intimate about listening while I am moaning and saying dirty things, giving you commands and taking you down into trance.

I enjoy interacting, I'm in my dominatrix headspace, and between sets of me recording files is a great time to ask questions, or tell me what a good boy you are knowing I am reading it right that moment. Sometimes I just go into top space and start talking low and dirty and fucking with your head from nowhere.

I like to banter, and you might find it fun to hear about what goes into files, or what I am planning- or input your own ideas and encourage me to start editing your favorite file as opposed to another so it comes out first.

Getting to know me as a person, can also help you to trust me more, allowing you to go even deeper into trance with this added connection for a more rewarding experience.

It won't be as polished as my files are:

When I am recording live, I make mistakes- so unlike my finished files where those mistakes are edited out, you're going to hear the bumps, the stumbled words, the clearing of my throat I do to make it easier to find and fix, and the repetition of whatever sentence I just fucked up.

A lot of files I like to do have sound effects and backgrounds I put in later, and discord only allows for mono recording- So for the stereo version,(which sounds so much more yum and leads to ASMR) you'll have to wait for the finished file.

Also helicopters and really loud trucks can cause me to pause until the sound is gone so my recording will be clean.

Lawn mowers shut me down and force me to reschedule.

However you can always stream background binaurals or music while I record...

Awesome Links you should check out for hypnosis recordings:

[Ultimate Binaural Beat Generator](#)

When I am recording a hypnosis file, it doesn't start off with binaurals, I add them later. So listening live if you enjoy the enhancement binaural beats bring to trance, this is hands down the best site. Just click the link, play with the tones a bit, and search for a tone that draws you in, makes your mind a bit fuzzy... your thinking slow.

And just pop it on a bit before I begin!

Alternatively, youtube has a lot of really great background hypnosis music for free you can stream behind my voice while I am recording. It adds a nice peaceful feel, and will help keep any mistakes or bumps from disturbing your trance too much.

[Spirals via Nimjas awesome site](#)

Now while in many of my hypnosis files, I have you close your eyes... it's not immediate and a good spiral works wonders on the visually inclined. Eye fatigue as your brain tries to process the fast moving lines, leads you to start feeling a bit sleepy... which is amplified by my voice and commands.

So if you like spirals- well, Nimjas awesome site is the go to.

Check it out, customize the spiral or image that draws you in, and also see how easy it is to add text to them.

Sometimes I will give a list before recording a hypnosis file, of trigger words or conditioning phrases from the file I am about to record.

Just add those words/phrases to the text adding thing, and this will help draw you deeper and increase the effectiveness of your trance.

Frequently Asked Questions

Q: If I come listen, do I have to interact?

A: Not at all! Your presence alone helps me get more excited about recording. While I love comments and thoughts on whatever I have just recorded, they are by no means necessary and you don't have to talk to anyone. You can just listen in while I make my files.

Q: If I am confused or need help with something, who do I ask?

A: Any of the mods but me. I have no interest in actually modding and some awesome people stepped up and offered to do it for me. They can assign you roles, help you figure out connection issues, and answer any questions you might have.

Tantle is my buddy who I made a mod just so people will annoy him.

Or you can just post in general chat, and whoever is available will try to help you out.

Q: What are "roles?" AKA What are those colors some people have their names in?

A: I don't even know anymore. My mods did a thing, that connects discord to patreon, and so users are tagged with their tier on patreon so they can access special channels.

There are also roles for various ways people choose to identify. I honestly need to redo the whole system though I think.

Sometimes, random roles and channels will just pop up. I normally am just as confused by it as you.

Q: Is it okay to join in on an active recording?

A: Pop in any time!

I normally record several files in a row, so if one of the scripts/files I am about to record turns you off, or you come in half way and don't want to listen to half a file, you can just pop out of the voice part of the channel, and keep an eye on the text part. Before I begin recording the next file I will (probably when I remember) make an announcement in the text channel, allowing you to hop in for the file you want to listen to recorded.

Before listening, you should go to your discord settings and change it so you don't get pinged when other users enter the channel- there are instructions shown above.

Q: Are you my Mistress now? Please Shibby, command me and tell me when to cum!

A: Fuck off. I have no interest in being anyone's personal online Mistress and devoting the amount of attention that would take. Nothing will quicker categorize you in my mind as an annoyance to be ignored then sending me messages asking me to take a personal interest in your masturbation choices.

I view LIVE recordings, and you listening to my files, about the same as I do scenes with people at kink events in the real world- While I am speaking to you, commanding you, playing with you-

you are mine. My slut and slave to play with and have my fun... But only for that scene, and during that scene. Until we do another scene!

While I think well and affectionately of those who listen to me, I do not particularly desire more personal connections as that would get really exhausting really quickly for me.

I love you guys, but there's just too many of you for any of that.

While I can be very outgoing and extroverted when I am in my top space... after a few hours of interacting with everyone I need to recharge emotionally from it.

Q: Shibby why are you so mean? Why will you not respond to my messages? :(

A: I honestly don't have the energy or inclination to be one of those super sweet to everyone types of online personalities.

During recording times I am your fucking Domina... or on some occasions slut and slave depending on the audio. But the rest of the time when I am on discord, I just want to relax, chat occasionally, play some video games with some people who have become my friends.

It's a place where I can share progress on audios, or vent a bit about issues I am having in the editing process.

Sometimes I'll talk about a problem and see if anyone has a good way to fix it.

I like posting pictures of my cats and my foster kittens, because they are goddamned adorable and I will kick anyone who says otherwise.

For those who want to get to know me, as a way to trust and sink deeper during files, it's a good place to see behind the whip to the real person.

And it's an awesome community and great place to talk about kink and hypnosis. I've had and seen a lot of lovely discussions on all sorts of topics!

Drama annoys me, and I have no qualms banning those who annoy me. This is my kingdom and the fun part about ruling in my own kingdom is... I can be a tyrant as much as I want.

And there's nothing you can do about it.

Q: So... I shouldn't ever message you?

A: I actually enjoy a lot of messages I get. I love hearing about how my files affected you, which ones you liked, your favorite things. I read every single one.

Sometimes interesting questions will get me to respond, or if you catch me in a really social mood and I have that energy and desire to chat.

Now, I don't answer them all even if I love them, because sometimes I am honestly just not in the mood to type out a bunch of stuff- but I always read them and appreciate your enjoyment of my files.

It's when messages delve into neediness I dislike, like 10 messages in a row with no response, or "why are you ignoring me?" or "Shibby tell me I can cum", attempting to call me unasked on discord... asking to call me on discord when I don't know you.

"Shibby can I ask you a question" irritates me. Just ask your question so I can make an informed decision on whether to ignore it or answer it or deal with it later.

To be honest, responding to messages takes energy, so while I appreciate and love them, I just can't respond to them all.

Some I will :)

I have a shit memory for names, and screen names makes it only that much harder- So please don't be sad if I don't remember you- the easiest way to get me to remember you is to include in your message what we talked about the last time we spoke.

Q: Can I masturbate while you are recording? Should I?

A: Absolutely! Unless the audio says not to or before the audio I tell you to just edge.

Q: What is your accent?

A: American/Australian mix

Q: Can I have a picture of you?

A: No. Some creepy ass stalkers ruined that for you.

Q: Do you do live sessions one on one?

A: No. I've tried it, but for one on one play touching is crucial to my domination and hypnosis style.

Q: How about IRL sessions?

A: No. I sometimes play with random subs at kink events, but generally I do the asking.

Q: Can I ask you about commissions or special projects?

A: You can ask. I may or may not be interested depending on compensation and my level of interest in the project.

I currently have no interest in myself writing scripts for commission, however given a script and money I will sometimes make it. My prices aren't cheap though, and you can likely find someone from GWA who will record your scripts for a *much* lower price.

I do on occasion offer specific files I am willing to personalize for you, as well as loops that are all about moaning your name and kinks, I will generally post in my subreddit when I feel I can handle a few, and only offer a limited amount as it's a lot of work, and in the past when I have accepted too many, I just got overwhelmed.

I generally don't take payment until I am in the process of creating a commission so if I do get overwhelmed and end up not making something, no harm is done.

Q: Why did I get kicked?

A: Because you broke the rules or annoyed me in some way. Or I was in a bad mood and you pinged me.

You can come back, but if you do whatever you were kicked for again I will ban you.

Q: How do I make it easier to HFO?

A: You make it more effective by not worrying about it's effectiveness. Enjoy the ride and don't worry about whether you will cum hands free or not. You will cum either way, during or after, and both will feel so amazing. So it doesn't matter, you don't need it to

matter. Just feel great, let yourself drift and eventually the hands free orgasm will come.

It just might take a few listens- and that's not a bad thing, now is it?

Have any more questions about the server or live recordings? Please ask them so I can add them to the FAQ.
