EXPERIENCE

Software Engineer - Volkswagen Group Digital Solutions India (Volkswagen Group Subsidiary) Pune | 25 July 2023 – Present
Dealer Stock Management Web Application – Development & Maintenance (Java)

- Made **critical upgrades** and developed new functionalities to reduce manual efforts and improved user experience resulting in enhanced business productivity.
- Resolved high-priority issues and refactored critical code paths, achieving an **80%+** improvement in system performance and stability.
- Served as **onsite** coordinator in **Belgium** for over **7 months** with **3 visits**; successfully facilitated cross-functional collaboration between stakeholders and offshore teams during three international assignments.

Software Engineer - Larsen & Toubro Infotech (Mumbai) | 13 Aug 2021 – 21 July 2023

Client: SCANIA (Volkswagen Group Subsidiary) (Java)

- Worked as a core software engineer responsible for ensuring **high availability and reliability** of business-critical applications.
- Fixed multiple high-priority incidents by performing thorough root cause analysis and implementing effective long-term fixes which saved estimated **5000\$** in project revenue.
- Utilized **Oracle SQL** and **Linux Bash scripting** for routine application maintenance, data corrections, and operational support tasks.
- Contributed to system stability by proactively identifying potential issues and streamlining troubleshooting processes.

Software Developer Intern

Larsen & Toubro Infotech (Bangalore) | Jan 2021 – June 2021 (*Internship*)

- Built a **Power Apps** solution to streamline issue tracking and ticket management, improving operational efficiency within the support workflow.
- Designed and implemented an automated ticket assignment feature, enabling **real-time allocation** of issues to available engineers based on workload and availability.
- Gained hands-on experience in **low-code application development**, process automation, and enterprise-level service desk optimization.

Technical Skills

Languages & Frameworks: Java, Spring Boot, Angular, Python, SQL

Cloud & DevOps: AWS (EC2,RDS,Lambda, VPC,Route53,SQS,S3),Docker, Kubernetes, Git

Tools & Platforms: Linux, REST APIs, Agile/Scrum

Additional Skills: Data Structures & Algorithms ,Microservices, Redis, Kafka, Maven, JDBC

EDUCATION

B. Tech (S.P.I.T), Mumbai | Aug 2018 – June 2021 (CGPA: 8.15)

- Participated in multiple **hackathons** focused on real-world problem solving, enhancing both technical and collaborative skills.
- Selected for the prestigious **e-Yantra Robotics Competition** by IIT Bombay; contributed to the development of a shortest-path-finding robot for autonomous block pick-and-place tasks.
- Emphasized software development alongside core electronics, building a strong interdisciplinary foundation in both hardware and programming.

AWARDS

Award for Innovation – Volkswagen IT Services (VWITS)

Recognized for delivering an **innovative solution** that improved business processes and added measurable value to the organization.
