

Action 2: Demand the Resignation of RFK JR

Updates

June 10, 2025: RFK Jr. has removed the entire Advisory Committee on Immunization Practices (ACIP), clearing the way to replace it with anti-vaccine allies—further undermining trust in vaccines and public health. Congress must demand his resignation.

June 2, 2025: Kennedy's anti-vaccine stance led to the cancellation of a bird flu vaccine contract and changes to COVID-19 vaccine guidance. An HHS report justifying these changes cited non-existent studies.

May 6, 2025: Kennedy announced federal exploration of alternative measles treatments, despite the proven effectiveness of vaccines. He also mandated placebo testing for new vaccines, delaying critical COVID-19 and flu vaccine development.

As Secretary of HHS, Kennedy has attacked science and public health, stalling NIH research, slashing budgets, and threatening decades of progress. His defunding of vaccination programs comes amid a deadly measles outbreak. He has made harmful, ableist claims about autism and is pursuing a disturbing "testing and research effort" to support his false beliefs.

Kennedy's actions endanger lives and erode public trust. Congress must hold him accountable and defend scientific integrity and public health.
