

Program: Logic Model (uses text boxes: add/change boxes and arrows as needed)
Situation:

			OUTCOMES		
INPUTS In order to accomplish our program activities we will need these resources	ACTIVITIES If we have access to these resources, then we can do these activities:	OUTPUTS We expect that once accomplished, these activities will produce the following evidence of service delivery:	SHORT (1-2 YEARS)	INTERMEDIATE (2-4 YEARS)	LONG (5+ years)

Assumptions: (Is this logic model based on any assumptions?)

External Factors: (What external factors are out of our control?)
