

[Soul land Reloaded] Quick tips start, format team squad and raise up BP.

In this guide, we will try to figure out how a beginner best start the game on a new server and how to further develop to be one of the best.

1. Quick start.

The advantage of playing on a new server is that the team GFN offers us a huge number of resources, with. which with the right and active game can reach a high level of pumping his team!

«Private Server Features»

1. Free VIP 13 (level 10, after completing stage 1, just check mail in-game)

2. 700.000 Diamond (200k in level 1), 500k from giftcode and events

3. Multiple free EVENT

4. x4 dmg (so, just upgrade your char, you can bypass normal dungeon)

I recommend that you read all available giftcodes before you start the game.

Server. For any player, whether he is a beginner or an advanced user, it is important to start promoting the account on a new server, where all players will be in equal conditions.

Active play on the new server will allow you to get ahead of the competition and receive the highest rewards.

Servers open approximately every 2 weeks, the last - s27 - 05.01.2023.

Free time. Going through all game activities takes a lot of time, and it will take even more for a proper start and fast progression. It is best to start the game on your day off and give it your full attention. You will be able to quickly master the gameplay, get bonuses to pump up your heroes and create a strong team.

Activity. It is very important to take part in all game events in order to get the maximum amount of resources to develop your account. Particular attention should be paid to completing daily and weekly tasks, as well as obtaining achievements.

LR hero. A great way to get an LR class hero without a donation is a BP raise event to the start game. It lasts for 2 weeks, at the end if you rank high (1-3) you can get LR hero fragments and many other useful resource.

Growth Tasks. It is very important for a beginner to quickly earn resources to pump good heroes and build a powerful team. During the first 7 days of the game you have the opportunity to perform tasks related to the main game activities. Tasks are unlocked gradually day by day.

Reward. As a reward for completing the task you will receive diamonds, gold coins, experience potions, energy items, resources for boosting heroes and equipment, in-game currency for purchases. For completing all tasks at the end of the event you will receive shards of hero SS class.

NOTE: All tasks can be performed during the event. If you play actively, you can earn the maximum number of rewards.

Level Increase. A great incentive for newcomers is the reward for leveling up a team of heroes. You can be rewarded for achieving a certain level with sets with pieces of heroes of different classes. There are 13 rewards ranging from reaching level 10 to level 90.

Purchases. Integral part of the game is the process of acquiring the missing items for the development of the game profile in various in-game stores. Therefore, for making purchases for newcomers also provides additional rewards in the form of diamonds, gold coins, experience potions and cultivation stones. There are eight rewards available, starting with 10 purchases and ending with 1,000 purchases.

2. Heroes. Choosing the heroes. Team building.

Heroes are characters with different combat skills. It is with their help you will have to explore the fantastic world, fight monsters and other users. Your task is to create a powerful team able to overcome all trials on your way.

Classification. Heroes differ from each other in appearance, class and attributes. Depending on the group the hero belongs to, he has certain values of the basic characteristics:

Health.

Attack.

Physical protection.

Magic protection.

Species. Depending on the species to which the hero belongs, he is placed in a certain combat position in the team and performs actions aimed at protecting or supporting allies, or goes on the offensive against the enemy. There are four types of heroes in the game:

DEF. Signified by the shield icon, heroes mostly defend allies.

Support. Denoted by a cross, the heroes are able to heal themselves and allies.

P.ATK. Signed with a sword icon, heroes deal physical damage to the enemy.

M.ATK. Signed with a book icon, heroes attack the enemy with spells.

Class. On each hero's card you can see his class, which is denoted by Latin letters LR, UR+, UR, SSR, SR, R and N. Of course, the best characteristics are characterized by LR class, first of all, pay attention to heroes of UR + class.

Attributes:

Survivability - combat survival skills.

Unit - the ability to attack single targets.

AoE - the ability to deal damage to a group of enemies.

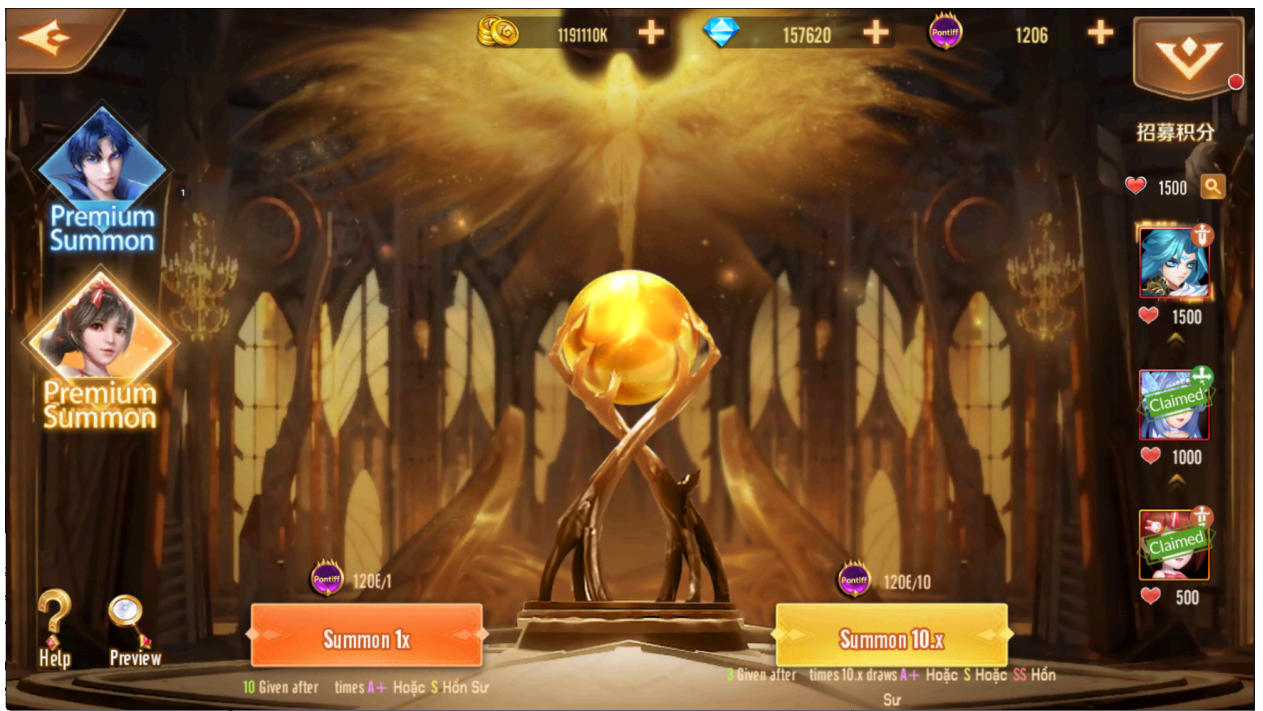

Control - ability to limit enemy movement.

DPS - The damage dealt is dependent on the type of attack.

Assist - the ability to increase the attack score by enhancing the team or weakening the enemy.

Protect - the ability to keep your allies healthy with defense and healing skills.

Team - the ability to defend your team's attacking heroes.

Getting. To open a new hero you need to collect a given number of shards. The main way to get them is a summoning, but you can also get the shards of heroes as a reward for participating in events and completing quests.

Soul Hall. In the Soul Hall location you can summon heroes using special tokens. It's very important to summon daily and as often as possible, this will increase your chances of getting high-class heroes to further strengthen your team.

Types of drafting:

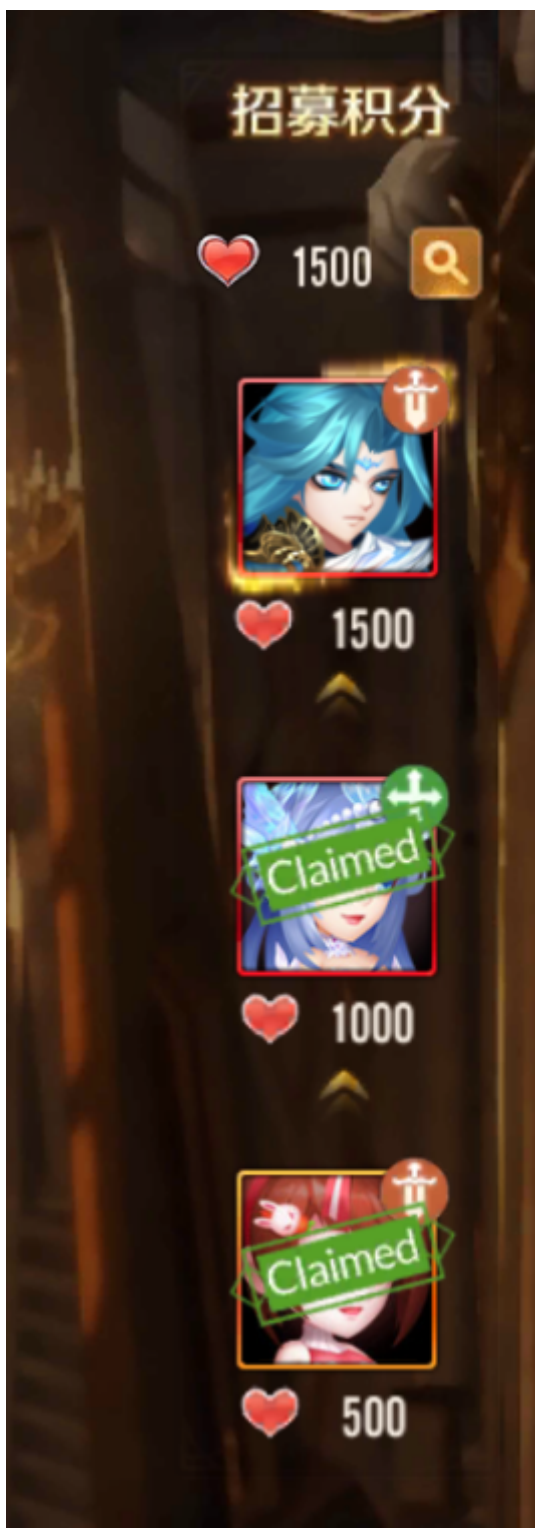

Regular - guaranteed hero SSR or UR after 3 calls and 5 free tokens daily.

Premium - guaranteed a Class SSR, UR, or UR+ hero after 9 challenges, 1 free token daily.

Receiving tokens. Regular draft tokens can be obtained as a reward for completing daily missions and earning points in the Arena. Premium Convocation tokens can be purchased for diamonds, 1 token costs 288 diamonds, however once a day you can purchase it at a discount of 144 diamonds.

NOTE: Purchasing tokens is a profitable investment of diamonds. It is best to purchase 10 summoning tokens at once for 2,590 diamonds. Also, don't forget to buy one token every day at a discount.

Reward Bonus. Multiple commissions of a premium summons will also reward you with shards of heroes. Thus for 500 rewards you receive SSR Hero Shards, and for 1,000 and 1,500 rewards you receive UR and UR+ Hero Shards. After the third award is received, the counter is reset and you get a chance to earn the reward again.

Shard sets. As a reward for completing quests you can get a Shard Pack, which will contain shards of heroes of a certain class. They can be found in the bag, here you can also use and choose the hero for which the shards will be obtained. Such sets can be obtained in events:

Normal Mode - reward for completing story chapters at Normal level.

Premium Summoning - the reward for completing a Premium Summoning.

We have decided what classes of soul masters there are and where you can get them, then we need to determine how to choose the right mix of masters, so they effectively synergize with each other

There are four main masters available to us, as well as up to 12 supports. At the beginning we need to decide on them and spend resources exclusively on them.

To determine which soul masters we should cast, we need to decide which heroes we can get now and which we want to get in the future (for example: from the event we get free LR, but in 10 days, but now we can only call UR and for a large number of summons get UR +)

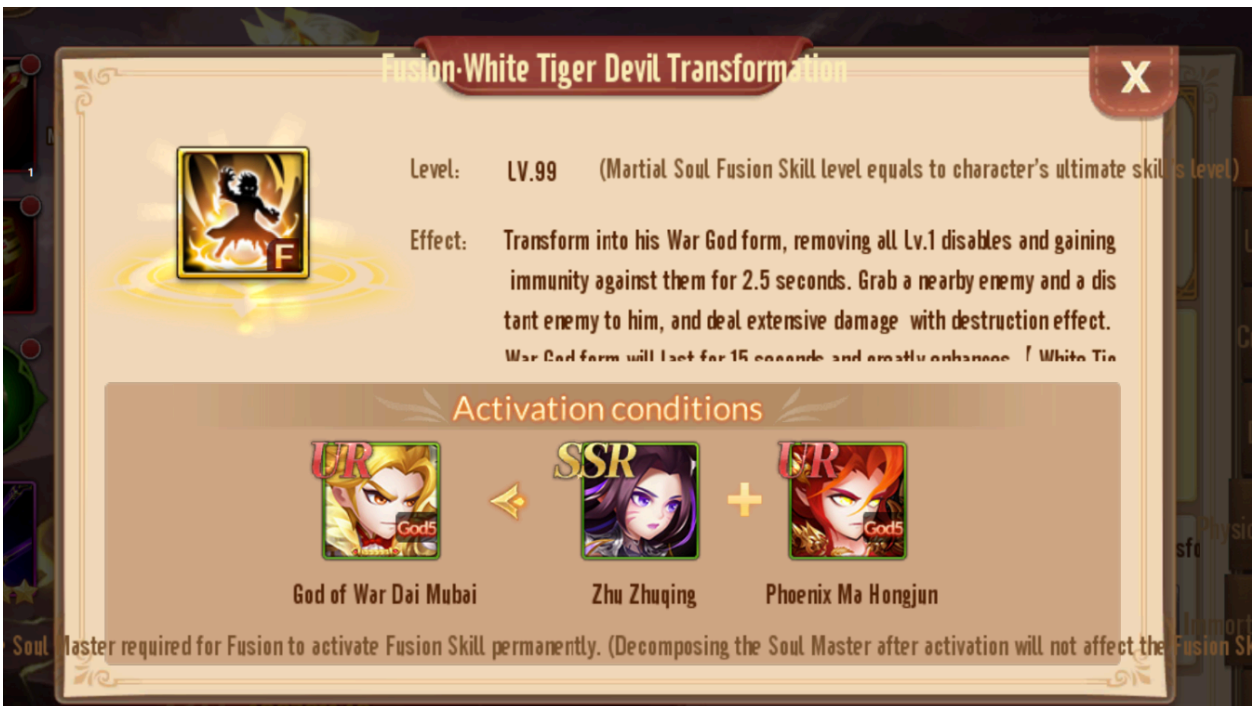

To understand which characters fit together, you need to focus on the overall composition: Tank - P.Dmg- M.Dmg – Support

But it does not always work, for example, tanks and high class supports quite a few, but at high pumping you can put only dmg dealer for example.

Suppose we have God of War Dai Mubai, we put it as the main soul masters

To strengthen it, it is worth paying attention to which heroes together he can use his special transformation

It turns out we need to put these two soul masters to activate his skill, then we also look at the special skills of the others and expose in this way ready main team.

Combat Power. Each hero has a BP, which is calculated based on the hero's level and equipment. The BP of all heroes of the team adds up and determines your success in the world of Soul Land Reloaded. To pump a character and increase his BP, you need to open the hero card and go to the right section.

Level. To level up you need to get experience points, which heroes can earn in the course of the Story Campaign. You can also use experience potions to level up your heroes faster. Leveling up is done in the Level up section.

NOTE: The level of the hero can not be higher than the achieved level of the team.

Star level. Assigning a star to the hero significantly improves the basic characteristics and increases BP. It is necessary to collect a given number of shards of the hero, after which the Upgrade button will be

activated. The higher the star level, the more shards you have to gather and the more expensive the upgrade cost.

Rank. An additional opportunity to pump a hero is to increase his rank, which is determined by the color of the hero's name and the attribute +1, +2, +3 and +4. A rank increase is performed for gold coins after the hero's equipment has been pumped up to a certain level.

Skills. Each hero has six skills that he uses in combat. Skills are unlocked gradually after the hero's rank is increased. For gold coins and skill points you can increase the level of the hero's abilities.

Cultivation. This method of boosting heroes allows you to increase their basic characteristics. Using special stones, you accumulate cultivation points, which allow you to increase the BP cultivation level. The better the method of cultivation, the more likely you are to get the maximum number of points per cultivation. The following types are available:

Normal - for cultivation stones.

Advanced Cultivation: For Cultivation Stones and Gold.

Luxury: For Cultivation Stones and Diamonds.

Skin. SSR, UR, UR+ and LR heroes can have their appearance changed in the Skin section. Each new image brings a bonus to the characteristics of the entire team. You can buy a new skin of the hero in the Skin Shop, which opens during a special event.

3. Gear

Equipment. Each hero has a standard set of equipment, consisting of weapons, robes, pants, and boots. Also, as the team level increases, accessories in the form of a ring and an amulet become available to the hero. Each item of equipment is responsible for increasing a

certain characteristic of the hero, and as you improve it you will be able to increase the BP.

Breakthrough. You can use special items and gold coins to increase the rank of each piece of equipment. The rank is indicated by the background color and rhombuses on the frame. Upgrading takes place evenly, after all items get the same rank, you become available to upgrade the hero's rank.

Note that the hero's level must meet the requirements to make a breakthrough.

Upgrade. This process of pumping equipment is an increase in the level of the item for gold coins. If you have enough resources you can immediately pump the item at once for 5 levels, with the proper luck the equipment will be pumped free of charge for a few more levels. The maximum level of the equipment depends on the level of the hero.

Awakening. In the section Awakening you can use special items and gold coins to increase the characteristics of the equipment, assigning them to the stars. Basically, the necessary resources can be obtained daily by opening Awakening treasure chests.

Bones. After a team of heroes reaches level 40, it is possible to equip heroes with soul dice. Each hero has 4 boxes to place the corresponding items. The dice of the soul differ by class, the higher it is, the higher the basic characteristics of the hero.

Advancement. Improving the characteristics of the dice is carried out on the same principle as the upgrade of equipment. You can upgrade the rank and level of an item. You can't change the class, but you can buy more powerful items in a special store.

Resources. Each item requires special items to upgrade, which you can get by passing the Story Campaign. Click on the missing item and the game will tell you in which locations you can get it. You can also purchase items in various in-game stores for gold coins, diamonds and other currency.
