

TUTORIAL - PT/EN

PORTUGUÊS

Como entrar na Hive com o link de convite da Criscia - crie sua conta gratuitamente sem ter que usar número de telefone ou e-mail

Um passo a passo para criar sua conta na Hive, logar e dicas para conseguir bons resultados:

1 - Entrar pelo link de referral da Criscia:

Eu sei, não tem link aqui né? Cada pessoa deve entrar com um link diferente, que a Criscia vai gerar e mandar pra você. Então entra em contato com ela pelo [whatsapp](#), [instagram](#) ou discord (crisciacm ou criscia#9736), que ela vai mandar o link pra você!

2 - Antes de se registrar, **baixe e instale no seu navegador** (tem que ser Chrome, Firefox ou Opera) **a extensão Keychain**. Aqui eu usei o Chrome como exemplo. Assim que você acessar o link de referral, já vai abrir essa página e você deve instalar a extensão (Clique em "Keychain"):

The screenshot shows the 'ON BOARD HIVE' referral page. At the top, there's a navigation bar with 'LEARN', 'CREATE ACCOUNT', 'EXPLORE', and 'REFERRAL LOGIN'. Below this is a three-step process: 1. Choose your account, 2. Backup your account, 3. Choose your dApp. A prominent yellow box contains a warning icon and the text 'Use Hive Keychain Browser Extension'. It explains that using the latest version of the Keychain extension is recommended for wallet and key storage. It also states that installing it 'right now' will automatically import the account and keys at the end of the signup process. To the right of this text are two buttons: 'Install KEYCHAIN' and 'then RELOAD PAGE'. Below the yellow box, there are links for 'EDIT REFERRER' and 'EDIT VIP TICKET'. The 'YOUR REFERRER' section displays a profile card for 'Criscia Cesconetto', a Biologist, Photographer, Surfer, and Community Builder. At the bottom, a small status bar indicates 'Your VIP Ticket is valid'.

Você vai ser levado para a página de instalação da Keychain onde você termina esse processo.

3 - Após instalar a extensão, volte na aba da figura anterior e **clique em “Reload Page”**, e a página deve atualizar para a seguinte:

ON BOARD
HIVE

JOIN THE **REVOLUTION.**

4 - Descendo a página, **escolha o seu nome de usuário**, assinale a caixinha concordando com os termos de serviço e depois em continuar. **Atenção: o seu nome de usuário não poderá ser mudado depois, então escolha um que será usado para sempre.** O nome de usuário deve ter de 3 a 16 caracteres. Apenas letras minúsculas. Números são permitidos, mas não para começar o nome. Pontos e traços podem ser usados, mas apenas quando há pelo menos 3 caracteres.

CONTINUE

5 - Salve suas chaves de acesso! Essa é uma das partes mais importantes: suas chaves de acesso da Hive precisam ser armazenadas em algum lugar que você considere seguro. Não deixe para depois, faça o download do arquivo e salve essas chaves agora mesmo. Assinale a caixinha no final da página (ela só será habilitada depois que você fizer o download do bloco de notas com as suas chaves), e clique em *“Create Hive Account”*.

ALMOST THERE!

This is your proposed account information.
After you save this info your account will be created.

```

Username: lourencoalart
Password: [REDACTED]

----- PRIVATE KEYS -----
Owner: [REDACTED]
Active: [REDACTED]
Posting: [REDACTED]
Memo: [REDACTED]

```

[DOWNLOAD BACKUP](#)

OR

COPY TO CLIPBOARD

⚠ WHY DO I HAVE TO SAVE THIS INFO?

- Because no one can recover your account if you don't have this info.
- If you loose these keys you will loose your account and any currency in the account.
- These keys are how you will be able to sign in and use sites.

SIGNING IN

After this you are likely going to sign into a website using a login software

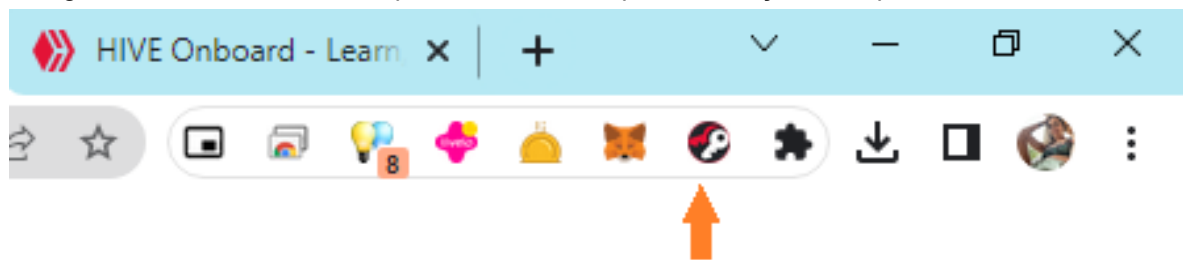

- The POSTING KEY can be used for login software like PeakLock and the Hive Keychain browser extension
- The ACTIVE KEY will help you login using HiveSigner software

You can change your password later, but for now you have to keep it safe. We don't offer account recovery yet, so be aware of the fact if you lose your password, your account cannot be recovered.

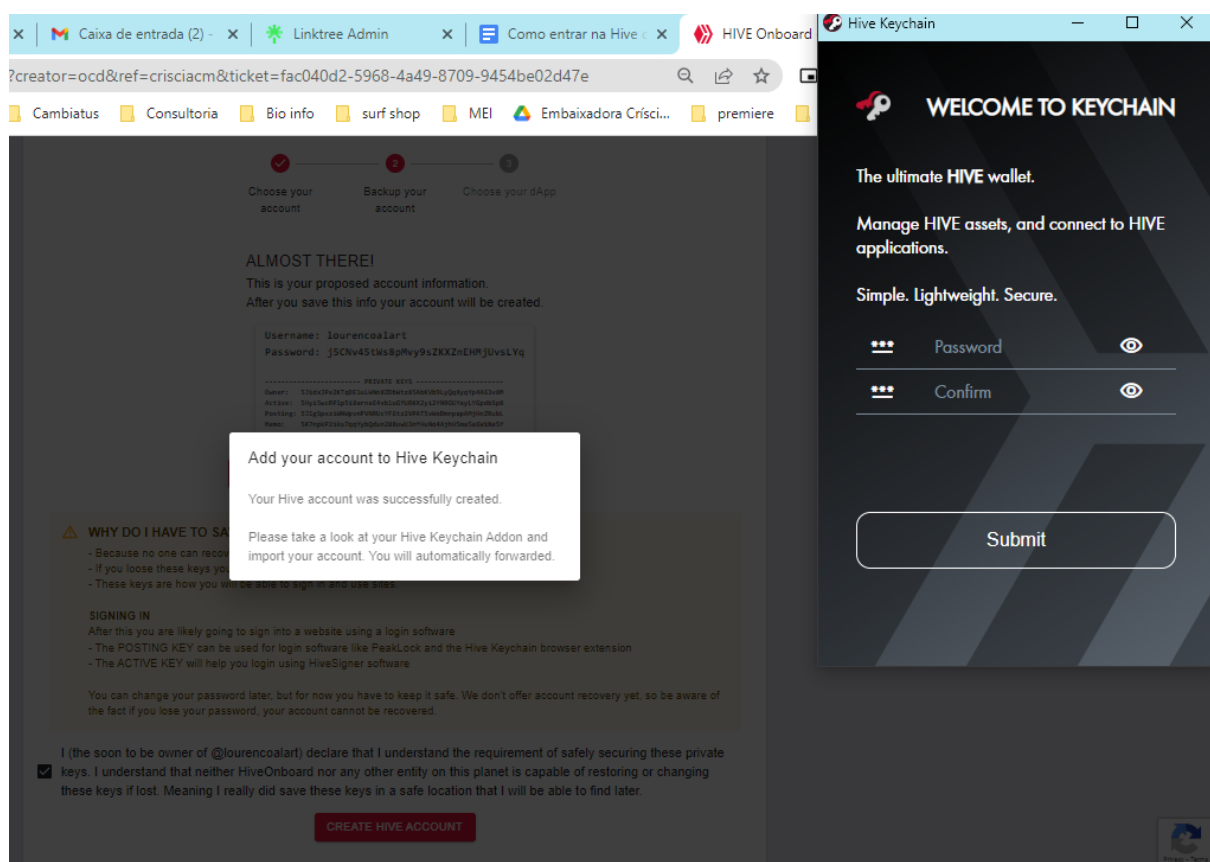

☐ I (the soon to be owner of @lourecoalart) declare that I understand the requirement of safely securing these private keys. I understand that neither HiveOnboard nor any other entity on this planet is capable of restoring or changing these keys if lost. Meaning I really did save these keys in a safe location that I will be able to find later.

[CREATE HIVE ACCOUNT](#)

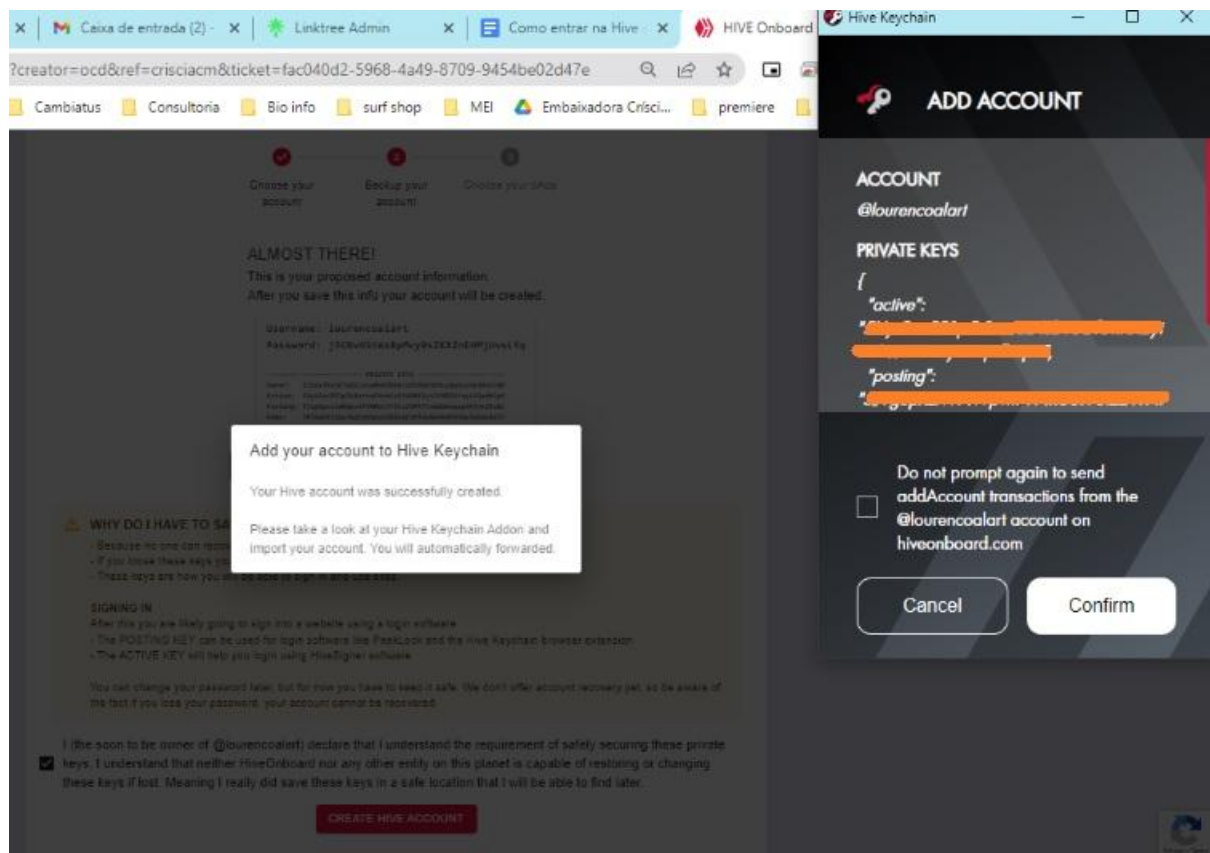

6 - Agora abra a extensão da Keychain. **Abra a Keychain** clicando no ícone dela na barra do seu navegador. Se não achar ela, clique no símbolo de quebra cabeça e ela aparecerá na lista.

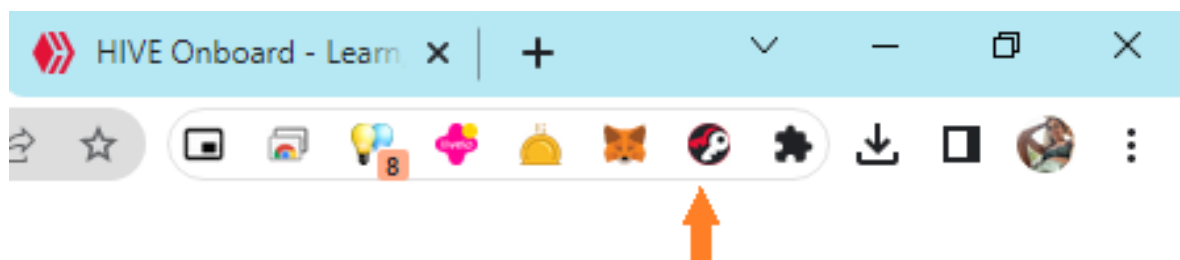

Crie uma senha para acessar a sua Keychain e clique em “*Submit*”. A Keychain é a sua carteira de criptoativos da Hive (como se fosse sua conta no banco, onde está todo o seu dinheiro) e ela guarda não só seus recursos \$\$, mas também todas as suas chaves de acesso da Hive (essas que você baixou no passo anterior).

Dê um check na opção “Do not prompt again to send addAccount transactions from the @seunomedeusuario account on hiveonboard.com” e depois confirme. (Porquê? Para criar e ativar sua Keychain, você precisa da chave de ativação que está naquele bloco de notas que você salvou. Se você não quiser fazer isso sempre, marque essa caixinha e confirme).

7 - Depois disso, sua extensão da Keychain vai fechar. **Abra a Keychain novamente** clicando no ícone dela na barra do seu navegador. Se não achar ela, clique no símbolo de quebra cabeça e ela aparecerá na lista.

8 - **Importe suas chaves para a Keychain.** Clique na primeira opção “Use keys/pwd”, preencha com o seu nome de usuário e com a primeira chave gravada no arquivo do bloco de notas que você salvou no seu computador (é a chave que se encontra logo abaixo no seu nome de usuário no arquivo do bloco de notas). Clique em “Submit” e depois em “Save”!

SETUP

You can add your keys by entering a private key or your master password.
Alternatively, you can specify an authorized account or import your keys.

Use keys/pwd

Import keys

← SETUP

Enter your Hive account name and either the master password or the private posting or active key for that account below. Your master password will NOT be saved and will only be used to generate your private keys.

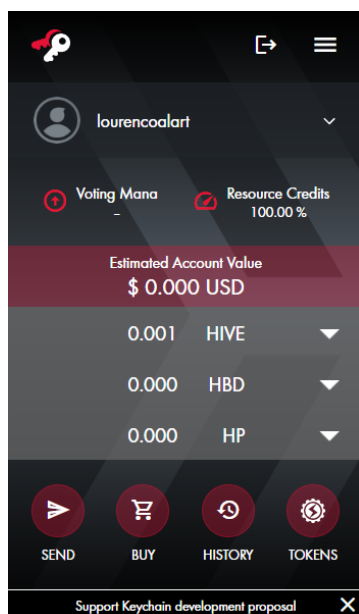

You may add / remove Hive accounts or keys at any time. If you need to create a new Hive account, you can do so at signup.hive.io/.

@ lourencoalart

Private Key

Submit

9 - **Pronto!** Sua carteira e sua conta estão criadas e configuradas e deve aparecer dessa forma:

10 - **Faça login na sua conta!** A Hive tem várias interfaces ou “caras” diferentes e a que a gente usa e recomenda para usar no computador é o *PeakD*. Entre no site <https://peakd.com/>, e no canto direito superior da tela clique em “Login”. A tela seguinte aparecerá:

Preencha o primeiro campo com o seu nome de usuário, clique na seta do lado direito e a extensão Keychain vai abrir novamente. Se você quiser deixar suas informações de login no PeakD salvas, marque a caixinha “Do not prompt again to verify keys for the @seunomedeusuario account on peakd.com” e clique em confirmar. **Agora sim, está tudo pronto para você começar a navegar na Hive e postar seus conteúdos.**

Próximo passo:

O que fazer após de cadastrar na Hive e dicas para o seu post de introdução

ENGLISH

How to join Hive with Criscia's invite link - create your account for free without having to use phone number or email

A step-by-step guide to creating your Hive account, logging in and tips for getting good results:

1 - Enter through Criscia's referral link:

I know, there's no link here, right? Each person must enter with a different link, which Criscia will generate and send to you. Then contact her via [whatsapp](#), [instagram](#) or discord (crisciacm or criscia#9736), and she will send you the link!

2 - Before registering, **download and install the Keychain extension in your browser** (it must be Chrome, Firefox or Opera). Here, I'm using Chrome as an example. As soon as you access the referral link, this page will open and you must install the extension (Click on "Keychain"):

The screenshot shows the 'ON BOARD HIVE' registration page. At the top, there's a navigation bar with 'LEARN', 'CREATE ACCOUNT', 'EXPLORE', and 'REFERRAL LOGIN'. Below this, a progress bar shows three steps: 1. Choose your account, 2. Backup your account, and 3. Choose your dApp. A prominent yellow box with a warning icon contains the text: 'Use Hive Keychain Browser Extension'. It states: 'It's highly recommended to use the latest version of Hive Keychain Browser Extension which will act as your wallet and safe storage of your keys. If you download and install it **right now** we will automatically import your account and keys into Keychain at the end of signup.' To the right of this text are two buttons: 'Install KEYCHAIN' and 'then RELOAD PAGE'. Below the yellow box, there are links for 'EDIT REFERRER' and 'EDIT VIP TICKET'. A section titled 'YOUR REFERRER' with a question mark icon shows a profile for 'Criscia Cesconetto', a Biologist, Photographer, Surfer and Community Builder. At the bottom, a small badge says 'Your VIP Ticket is valid'.

You will be taken to the Keychain installation page where you finish this process.

3 - After installing the extension, go back to the tab in the previous figure and click on “*Reload Page*”, and the page should update to the following:

ON BOARD
HIVE

JOIN THE **REVOLUTION.**

5 - Save your access keys! This is one of the most important parts: your Hive access keys need to be stored somewhere that you consider safe. Don't leave it for later, download the file and save these keys right now. Check the box at the bottom of the page (it will only be enabled after you download the notebook with your keys), and click on *"Create Hive Account"*.

ALMOST THERE!

This is your proposed account information.
After you save this info your account will be created.

```
Username: lourencoalart
Password: [REDACTED]

I understand that neither HiveOnboard nor any other entity on this planet is capable of restoring or changing these keys if lost. Meaning I really did save these keys in a safe location that I will be able to find later.

[CREATE HIVE ACCOUNT](#)

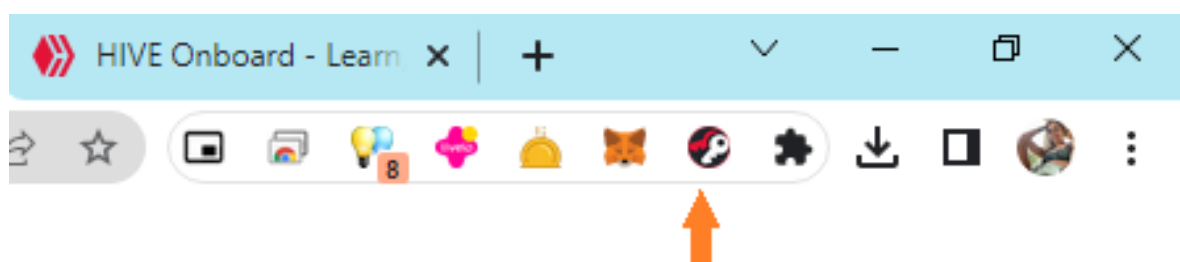

6 - **Create a password to access your Keychain** and click on “*Submit*”. The Keychain is your Hive cryptocurrency wallet (like your bank account, where all your money is) and it holds not only your resources \$\$, but also all your Hive access keys (the ones you downloaded in the previous step).

Check the option “Do not prompt again to send addAccount transactions from the @yourusername account on hiveonboard.com” and then confirm. (Why? To create and activate your Keychain, you need the activation key that is in that notepad you saved. If you don't want to do this every time, check this box and confirm).

7 - After that, your Keychain extension will close. **Open Keychain again** by clicking on its icon in your browser bar. If you don't find it, click on the puzzle symbol and it will appear in the list.

8 - **Import your keys into Keychain.** Click on the first option “*Use keys/pwd*”, fill in your username and the first key recorded in the notepad file that you saved on your computer (it is the key that is found just below your username in the notepad file). Click “*Submit*” and then “*Save*”!

SETUP

You can add your keys by entering a private key or your master password.
Alternatively, you can specify an authorized account or import your keys.

Use keys/pwd

Import keys

← **SETUP**

Enter your Hive account name and either the master password or the private posting or active key for that account below. Your master password will NOT be saved and will only be used to generate your private keys.

You may add / remove Hive accounts or keys at any time. If you need to create a new Hive account, you can do so at signup.hive.io/.

Support Keychain development proposal

10 - **Sign in to your account!** Hive has several different interfaces or “faces” and the one we use and recommend to use on the computer is PeakD. Enter the website <https://peakd.com/>, and in the upper right corner of the screen click on “Login”. The following screen will appear:

Fill in the first field with your username, click on the arrow on the right side and the Keychain extension will open again. If you want to save your PeakD login information, check the box “*Do not prompt again to verify keys for the @yourusername account on peakd.com*” and click confirm. **Now, everything is ready for you to start browsing Hive and posting your content.**
