BEHS uses a Proficiency Based Education model for grading and scoring content indicators by standards. Student learning of these standards are measured using summative assessments, which are scored only on course content comprehension. Summative assessments account for 80% of the student's course grade. Student work completion and meeting established deadlines account for the remaining 20% of the final grade. The final transcript grade is converted to an alpha grade. However, the GPA is reported as an average of all course grades on the 1-4 standards scale. Students must receive a 2.7 or higher in order to earn credit for a course. If they earn below a 2.0, they will receive an NC (no credit - repeat course). If remediation is recommended to complete/finish a course, a score below 2.7 may appear on the transcript and include credit.

PBE Standards Scale

4 = Meets with Distinction/Exceeds
3 = Meets
2 = Partially Meets
1 = Does Not Meet
