3D Design Year 10 Revision

Year 10 will have an exam assessment which will include:

A 3D CAD practical piece of work using Sketchup / photoshop.
The work will be included as Component 1, unit 2:

A02: Refine work by exploring ideas, selecting and experimenting with appropriate media, materials, techniques and processes.

Duration: 1 hour including logging on / screen shots

Final work should be developed from or link with your current project studies in different CAD media. It is important to show that you have experimented with processes and techniques, so you should present your samples and studies carefully in your slide show.

All students would benefit from watching all video demonstrations as tools and techniques can be utilised across all projects, especially for more advanced learners.
