

Potential Mappers

Rui Antunes – Portugal, but available world-wide; Field checking and cartography

Jim Arsenault – New Hampshire; Northeast U.S. mapping; LiDAR basemaps

Jim Baker – Colorado; Field checking and cartography using Open Orienteering Mapper

Gregory Balter – New York; Base maps from LiDAR and other sources

Ron Birks – Arizona; Field work in the Southwest U.S.

Rick DeWitt – Connecticut; Basemaps, field checking, and drafting. Prefer mapping projects in the northeastern part of the U.S. (roughly Ohio eastward), but would consider projects farther afield

Will Dickinson - Will@WildTerrainNav.com, [Wild Terrain Navigation](#), Wisconsin; creation of maps for orienteering and adventure racing. Available services include:

- Creation of basemaps from LiDAR and DEM data.
- OCAD/OOM cartography.
- GPS-based field surveying.
- Vector design and layout, printing consultation for complex projects such as adventure races.
- Supplemental GIS analysis in QGIS - merging, point density / kernel density / heatmaps.
- Drone-based imagery acquisition (FAA commercial drone pilot).
- Map creation training and tutorials/workshops for individuals, clubs, companies, and organizations.

Past work includes orienteering, MTBO, and Ski-O maps for Clubs (GRIZO and BGR), and AR maps (Rib Mountain and Elkbones).

drb-kartografi – Sweden; Basemaps

Clare Durand – California; Basemaps and Fieldchecking

Emerald Cartography – South Carolina; Base maps and OCAD drafting (OCAD 12).

Daniel Heimgartner – Virginia; “I was born in Switzerland, have competed worldwide, and done mapping and drafting by hand and OCAD for more than 40 years. Physical limitations have left me unable to move through uneven ground, but drafting I can still do. I would welcome your OCAD work.”

Coti Marian – Europe; Began mapping in 1987 as an amateur. Starting in 1994 I’ve worked as a professional mapmaker for different companies. I was employed by French Federation of Orienteering for 3 years. In 2004 I created my own company. I’ve mapped maybe more that 400 maps in different countries (Belgium, Canada, Egypt, Germany, France, New Caledonia, Romania, Switzerland, Spain, USA,...) but the biggest part in France.

Bruce Moore - Brucewithamap@gmx.com; Central Kentucky and Middle Tennessee region with travel possible. Complete mapping services include base map production using Lidar and drone aerals to field checking and drafting. I have completed over 20 maps from start to finish and updated hundreds of others. Web page with samples coming soon.

Galen Moore galen.a.moore@gmail.com Offering complete map preparation or any part(s) of the process including LiDAR tile selection, merging, homogenization of point density, Imagery processing; merging, georeferencing, generation of NDVI imagery, any degree of ‘base map’ partial map creation, automated symbolization of vegetation (where LiDAR and the nature of the veg cooperate), field surveying with a Juniper Geode sub-meter GPS receiver and a Toughpad tablet. Denver-based, post career and free to travel, insured.

Yves Nager – Hawaii; Available for mapping projects anywhere in the US or Canada. “Fieldchecking and drafting with OCAD. I am originally from Switzerland and now live in Hawaii. I have worked on more than 20 orienteering map projects since 1991. My most recent projects were for RMOC in Colorado where I mapped a total of more than 15 km².”

Northline Navigation – North Carolina; LiDAR basemaps, field checking, and drafting in OpenOrienteering Mapper (OOM). Available for mapping projects in the southeastern United States.

Oakdale Mapping – New Zealand; Basemaps

[Olles Cartography](#) – Czech Republic; Fieldchecking, cartography, visual art

[Red Arrow Maps](#) – Maryland; Base maps (often using LiDAR data) and race map production for orienteering and adventure races.

[Mike Schuh](#) – Washington; Base maps and other services

[Krum Sergiev](#) – Vermont; Field checking, cartography using OCAD

[Jon Torrance](#) – District of Columbia; Basemap creation, field checking, and OCAD cartography. Available/authorized to work throughout the U.S. and Canada.

[Trailmaps](#) – Scotland; Field checking and OCAD cartography.
