

REVIEWER REPORT

Comments to the Author

Dear Reviewer,

Your thorough and timely review report is essential to the peer-review process. Your role is not limited to the evaluation. Please note that you review the research work to help the authors improve their research and to write a better research paper.

*We want to ensure the quality of the review. **Please note that the use of AI tools to generate review reports is strictly prohibited.** We have attached a sample review report for your reference. [\[Please click here\]](#).*

You may write your review report in any format of your choice. However, please consider the following items:

*** Please delete paragraph in Italic*

Manuscript Identification #:

Title:

Your Recommendation: Accept/Major Revision/Minor Revision/Reject/Submit Elsewhere (See Table 1)

Major Comments

1. Please give your evaluation and opinion in general, including your decision.
2. Please discuss whether this research belongs to the Industrial Engineering community.
3. Please discuss how well this research explains the gap between the state-of-the-art and this research.
4. Please evaluate the significance, timeliness, and practical potentials of the problem addressed by the manuscript.
5. Please verify and discuss the contributions to the theory or scientific knowledge that this manuscript makes.
6. Please evaluate the novelty and methodological rigor of the modeling and the approach, including their correctness.
7. Please provide specific suggestions for improvement to the style of presentation, including article length, use of figures or tables, and sections to be deleted or added.
8. Please discuss the correctness of math in the paper.
9. Please evaluate whether the writing is logical and easy to read and whether there are excessive grammatical and punctuation errors, suggesting the professional editorial service.

Table 1. Guidelines for your recommendation.

Accept	This manuscript is ready and suitable for publication as submitted. No improvement, including English usage, is required.
Revision required /Minor revision	This manuscript would be acceptable if the minor revision has been completed in accordance with the reviewers' comments. I am willing to review the revision again.
Resubmit for review / Major revision	This manuscript requires major revision and/or rewriting. I would be worth another review process if the major changes have been made in accordance with the reviewers comment. I am willing to review the revision again.
Submit elsewhere	This manuscript is not suitable for publication in this Journal because its content is not related to the scope and focus of this Journal. However, the manuscript can be resubmitted to another journal.
Reject	This manuscript may be desk rejected due to various reasons. The reasons include non-compliance to the guidelines of Journal, unfit with the scope and focus of Journal, lack in methodological and theoretical rigor, etc.
