Swivl C Series Kit				
Component	QTY	Description	Missing or Damaged? (Y/N)	Cost to replace
Base	1	The big round thing in the center of the box that Swivls!		\$659
Primary Marker	1	The main microphone (no color sticker) that sits in the dock of the robot base.		
Secondary Markers	2 or 4	The extra microphones in slots (color stickers affixed)		\$269 per 2
Lightning to Micro-USB cable	1	White cable with a lightning connector on one end and Micro-USB on the other. Used to connect Swivl with most iOS devices.		\$19
Micro-USB to Micro-USB cable + Type C Adapter	1	Black cable with Micro-USB connectors on each end. Used to connect Swivl with older Android devices. Depending on the age of your kit, the Type C adapter may be attached to the cable already, or it might be detached. Type C adapter affixes to either end of the Micro-USB cable. Use Type C to connect Swivl with most Android and some newer iOS devices.		\$19
4 Port USB Wall Charging Block / 3 Port USB Wall Charging Block	1	The USB ports can be used to charge the robot, secondary markers, and even your mobile device in one central hub.		\$39
USB to 3.5 mm plug	1	Charges the robot (no cord is necessary for the Primary marker, as it charges when it is docked in the base)		\$10
USB to barrel plug	1 or 2	To be honest, we don't know the official name but it looks like a hammerhead shark on one end. Used to charge the secondary markers.		\$29 each
Shims	3	Labeled A, C, and D. Swap shims out in the grip of the robot base to mount your mobile device securely and firmly.		\$10

Neck Lanyard	1	Longest lanyard, typically for the Primary marker		\$15
Marker Clip	1	Typically for clipping the Primary marker to a lapel or clothing		
Wrist Lanyards	2 or 4	Optional for Secondary markers, but never the Primary		NC
Carrying Case	1	The big black case that holds all of the above components!		\$39

Other Accessories

Floor Stand	1	For mounting your robot in the classroom		\$99
Expand Lens Mini	1	An Expand lens mini allows you to expand the angle of your mobile device/PC camera view.		\$29
Mount Anything Grip	1	Unlike the shims, this is used to replace the entire grip in the robot to mount a mobile device with a thick case.		\$29
