

Careers at Stratify

Lead Front End Engineer (On-call)

ENGINEERING

Location: Prague

Stratify is building a next-generation cloud budgeting, forecasting, and reporting solution platform designed to enable finance teams to be more strategic and engage stakeholders across the organization in a continuous planning process.

We're on a mission to create cutting-edge web experiences, and we're looking for a talented Lead Front End Web Engineer with approximately 4 years of React experience to join our globally distributed team, who is also willing to respond to on-call issues.

Responsibilities

Are you a skilled Front End Web Engineer with a passion for leading and mentoring teams? Do you have around 4 years of hands-on experience with React? If you're ready to take on a leadership role and work with a diverse team located across the US and Europe, we want you to be a key player in our journey.

What you'll do:

- Lead and mentor a distributed team of front end engineers, providing guidance and support to ensure successful project delivery.
- Collaborate with cross-functional teams to design, develop, and maintain high-quality, responsive web applications using React.
- Take ownership of the front-end architecture and ensure best practices are followed.
- Lead code reviews, provide constructive feedback, and enforce coding standards.
- Drive innovation in front-end development, staying updated with the latest trends and technologies.
- Work closely with product managers, designers, and other stakeholders to translate requirements into scalable and maintainable solutions.
- Strive to build insanely usable applications.
- Foster a collaborative and inclusive team culture, promoting knowledge sharing and continuous learning.
- Coordinate with team members across different time zones in the US and Europe.
- Participate in an on-call rotation to promptly respond to critical issues outside of regular working hours.
- Troubleshoot and debug issues, ensuring seamless user experiences.
- Develop, test, and deploy new features and enhancements.
- Optimize applications for performance, scalability, and security.

Requirements

- Bachelor's degree in Computer Science, Web Development, or a related field, or equivalent work experience.
- Approximately 4 years of professional experience in front-end web development, with a strong focus on React.
- Proven experience in a lead or senior engineering role, with a track record of successfully delivering projects.
- In-depth knowledge of modern web technologies, including HTML5, CSS3, and JavaScript.
- Experience with state management libraries, such as Redux or MobX.
- Strong understanding of responsive design principles and mobile-first development.
- Excellent leadership, communication, and collaboration skills.
- Willingness to participate in an on-call rotation to respond to critical issues outside of regular working hours.
- Ability to work effectively with a distributed team across multiple time zones.
- Passion for staying updated with industry trends and best practices.

Nice to have:

- Experience with tabular data/grid applications.
- Experience with other front-end frameworks and libraries (e.g., Angular, Vue.js).
- Knowledge of back-end technologies and API integration.
- Familiarity with CI/CD pipelines and version control systems (e.g., Git).
- Contributions to open-source projects or a strong online portfolio.

If you're a talented Lead Front End Web Engineer with expertise in React, and you're willing to respond to on-call issues, we'd love to hear from you. Join our team and help us create exceptional web experiences!

Please send your resume and a cover letter highlighting your relevant experience to hello@stratifytech.com.

Stratify Tech is an equal opportunity employer. We value diversity in our workplace. We look forward to receiving your application and the opportunity to welcome you to our globally distributed team.
