

Adding Gadgets & Widgets to Your Blog

1. Start in your Blogger dashboard and click layout in the down arrow for more options

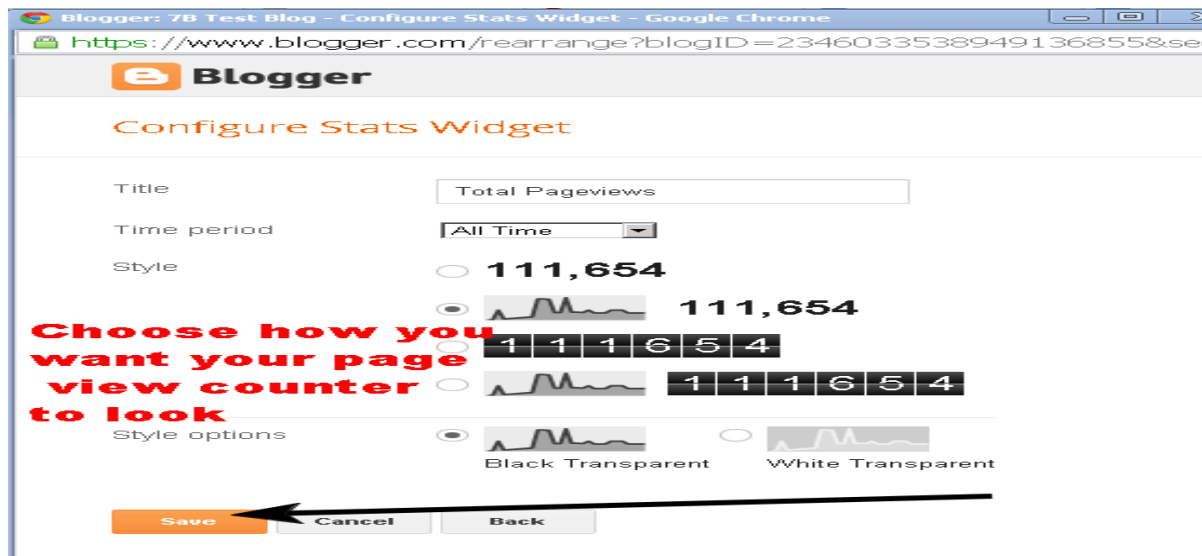

2. Click on add a gadget in the layout section

3. Click on the plus next to Blog Stats (This gadget tells you how many times your blog has been viewed)

4. Choose how you want the Blog Stats to look and then click save

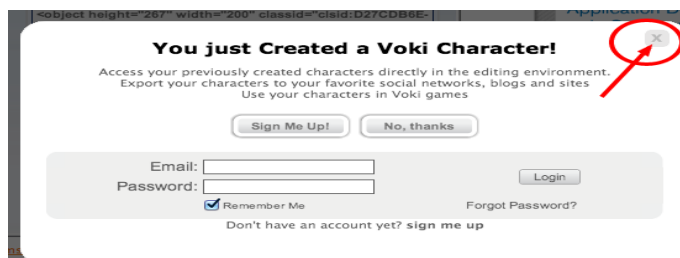

5. Do the same process to add Blog List (This gadget will list the blogs you like)

6. Do the same process for Subscription Links, but type Subscribe to my Blog before clicking save.

***If you want to add a Voki (talking person like on my blog) follow below

1. Go to Voki.com and create a Voki.
2. When you are done creating and typing something for your Voki to say, click publish.
3. Name your scene Voki
4. Click the X on top right to skip creating an account

5. Copy the embed code (Automatically copies when you click in

the box)

6. Go back to layout in Blogger and click add gadget. Find the gadget called HTML/Java Script. Paste in the code using CTRL+V

****Remember to click the orange save button on top right after adding gadgets!**
