{firstname} this is a shocking stat about AI & local businesses
{firstname} I couldn't believe local businesses were doing this with AI

Mail

Hello {firstname},

I saw a shocking stat 2 days ago about AI.

Only 25% of small businesses are using AI.

How can that be possible? Everyone has to be using AI, right?

Well, it turns out small business owners aren't exactly loving the way AI is used. They don't like prompts, they don't think like prompt engineers and they don't like 'promptversations'.

All they want is to get their job done. They want to come in, click a button and get the results like the good old days.

You can't expect salon owners, dentists, doctors, builders, fixers, pool–people to also be AI experts; can you?

Well, the good news is now you can help them get it done and get paid.

This is about this new tool Writix that just got launched and is targeted to help small and local businesses use AI properly.

Instead of forcing people to use Prompts it gives everything to the customers in easy to use menu fashion – The way they like to use the computer.

Here's what Writix has

📦 300+ Readymade Workloads (Everything you need for your business)
🛠️ Supports Custom Workloads (make your own)
🤖 Interactive Task Assistant (Just tell AI what you want and let it figure it out)
⚡ Task Packages (Put in one input, get everything done with the click of a button)
🤝 Multi-AI (Do your work with the best AIs)
