REPORT MADE AT Site-65, Canada	APPR. DATE 1/03/2025	FILE LOCATION Site-65, Floor 3	REPORT MADE BY Christian Tierson
-----------------------------------	-------------------------	-----------------------------------	-------------------------------------

OFFICIAL REPORT:

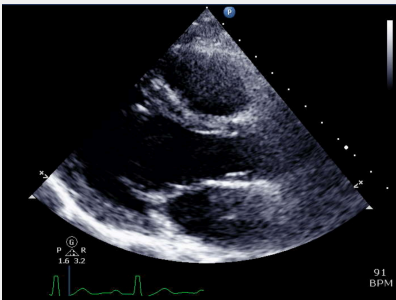

At approx. 6:23pm on March 1st, 2025, a young woman entered medbay with armed E-11 escorts who demanded she be quarantined from personnel. Upon completion of this request, all CL2 staff were instructed to leave under orders from Site Administration.

The young woman presented with a fever, shivering, pseudobulbar affect, and heightened heart rate. Medical personnel were instructed to wear hazmat suits before interacting with the young woman, who was authorised to receive treatment. Beta-Blockers [Sotalol], anti-inflammatories [Aspirin], and several labs were ordered and came back inconclusive. The woman was placed under observation for the next 48 hours, and staff were asked to leave.

At approx. 10:43am on March 2nd, 2025, E-11 escorts delivered an anomaly casefile to Site-65 Medbay Reception. A note from this casefile has been photocopied into this file for safekeeping. Observation continued, and the young woman began presenting with several changes to her physical appearance, of which are listed comprehensively below.

DETAILS:	EYE COLOR	BRW -> PNK
	HAIR COLOR	BRW -> BLU
	WEIGHT	70KG -> 67KG
	HEIGHT	5'5" -> 5'8"

Further Changes
recorded after
05/03/2025 -
Exploratory
Surgery

ADD. INFORMATION	
Liver, Stomach, Bladder, Pancreas, Gall Bladder.	Each organ listed to the left appear to have changed from flesh and blood, to balloons. Each attempt to transplant regular organs into Patient result in the organs being rejected, turned into balloons, or 'popped'.
Small and Large Intestines.	Through exploratory surgery, staff found the entirety of the patients intestinal tract appears to be made up entirely of a giant 'party horn', the length of the organ turned green with stars.
Lungs.	Patient's lungs appear to remain the same in shape, however they now take the appearance of whoopie cushions, complete with the SCP logo on the plastic. If coughing or laughing too hard, subject appears to be able to manifest a horn sound.
Heart.	Subject's heart was found to be cartoonishly shaped rather than anatomical. Functions remain unimpaired.
