

# **Title of the Paper (16 point, Bold, Times New Roman)**

First Author's Name<sup>1</sup>, Second Author's Name<sup>2\*</sup>, Third Author's Name<sup>3</sup>, .....

<sup>1</sup>Affiliation (Department, Faculty/College, Institution/University)

<sup>2,3</sup> Affiliation of other authors, if different (Department, Faculty/College,  
Institution/University)

Corresponding author's email:

## **ABSTRACT**

The manuscript should contain an abstract within 300 words. The manuscript should have a self-contained, citation-free abstract and state briefly the purpose of the research, methodology, key results and major conclusions. Abstract should be in a single paragraph with running sentences. Do not use any subheading or point list within the abstract. Also, non-standard or uncommon abbreviations should be avoided, but if essential they must be defined at their first mention in the abstract itself.

**Keywords:** Authors are advised to write **3-5 keywords** related to the article, separated by comma. These keywords will be used for indexing purpose.

## **1 Introduction**

Mostly Papers start with introduction. It contains the brief idea of work, requirement for this research work, problem statement, and Authors contribution towards their research. Sufficient recent reference citation [1] from last 2 years should be included for showing the existing challenges and importance of current work. This section should be succinct, with no subheadings unless unavoidable [2, 3]. State the objectives of the work and provide an adequate background related to your work, avoiding a detailed literature survey or a summary of the results.

## **2 Research Methodology**

This part should contain sufficient detail to reproduce reported data. It can be divided into subsections if several methods are described. Methods already published should be indicated by a reference [4], only relevant modifications should be described. Methodology should be written concisely in detail by maintaining continuity of the texts.

## **3 Theory and Calculation**

A Theory section should extend, not repeat, the background to the article already dealt with in the Introduction and lay the foundation for further work. In contrast, a Calculation section represents a practical development from a theoretical basis. Do not add extensive basic definitions or well-known theories, instead highlight theoretical background and its specific usages in view of your work only.

## Mathematical Expressions and Symbols

Mathematical expressions and symbols should be inserted using **equation tool** of Microsoft word. References may be added for used equations to support its authenticity, e.g. this result has been analysed using Fourier series [5].

$$f(x) = a_0 + \sum_{n=1}^{\infty} \left( a_n \cos \cos \frac{n\pi x}{L} + b_n \sin \sin \frac{n\pi x}{L} \right) \quad (1)$$

## 4 Results and Discussion

This section may each be divided by subheadings or may be combined. A combined Results and Discussion section is often appropriate. This should explore the significance of the results of the work, don't repeat them. Avoid extensive citations and discussion of published literature only, instead discuss recent literature for comparing your work to highlight novelty of the work in view of recent development and challenges in the field.

### Preparation of Figures and Tables

Authors are supposed to embed all figures and tables at appropriate place within manuscript. Figures and tables should neither be submitted in separate files nor add at the end of manuscript. Figures and Tables should be numbered properly with descriptive title. Each Figure/Table must be explained within the text by referring to corresponding figure/table number. Any unexplained or unnumbered Figure/Table may cause rejection of the paper without being reviewed.

#### 4.1.1 Formatting Tables

Table should be prepare using table tool within the Microsoft word and cited consecutively in the text. Every table must have a descriptive title and if numerical measurements are given, the units should be included in the column heading. Formatting requirement has been summarized in the Table 1.

**Table 1: Summary of formatting requirement for submitting paper in this journal**

| Layout        | Size                                  | Margin (Normal)                            | Header                                     |                                   |                                   |
|---------------|---------------------------------------|--------------------------------------------|--------------------------------------------|-----------------------------------|-----------------------------------|
| Single column | A4 (8.27" X 11.69")                   | Top=1"<br>Bottom=1"<br>Left=1"<br>Right=1" | Do not add anything in the header          |                                   |                                   |
| Font          | Article Title                         | Headings                                   | Subheadings                                | Reference list                    | Text                              |
|               | Times New Roman, 16 pt, Bold, centred | Times New Roman, 12 pt, Bold, Left aligned | Times New Roman, 12 pt, Bold, Left aligned | Times New Roman, 12 pt, Justified | Times New Roman, 12 pt, Justified |
| Line Spacing  | 1.15                                  | 1.15                                       | 1.15                                       | 1.15                              | 1.15                              |
| Page number   | As given in this document.            |                                            |                                            |                                   |                                   |

#### **4.1.2 Formatting Figures**

All figures should be cited in the paper in a consecutive order, author may be asked to provide separate files of the figure. Figures should be used in bitmap formats (TIFF, GIF, JPEG, etc.) with 300 dpi resolution at least unless the resolution is intentionally set to a lower level for scientific reasons.

**Figure 1: Sustainability**

## **5 Conclusions**

Each manuscript should contain a conclusion section within 250-450 words which may contain the major outcome of the work, highlighting its importance, limitation, relevance, application and recommendation. Conclusion should be written in continuous manner with running sentences which normally includes main outcome of the research work, its application, limitation and recommendation. Do not use any subheading, citation, references to other part of the manuscript, or point list within the conclusion.

## **6 Declarations**

### **6.1 Study Limitations**

Provide all possible limitation faced in the study which might significantly affect research outcome, If not applicable write, none.

### **6.2 Acknowledgements**

All acknowledgments (if any) should be included in a separate section before the references and may include list of peoples who contributed to the work in the manuscript but not listed in the author list.

### **6.3 Funding source**

Provide funding source, supporting grants with grant number. The name of funding agencies should be written in full, if no funding source exist, write, none.

## References

All references should be cited within the text correctly; do not add only list of references without citation within the text. All cited references should be listed after declarations section in the following style-

- [1] Abma, W. R., Driessen, W., Haarhuis, R., Loosdrecht, M.C.M., 2010. Upgrading of sewage treatment plant by sustainable and cost-effective separate treatment of industrial wastewater. *Water Science and Technology*, 61 (7), 1715–1722.
