Abstract

The manuscript must be accompanied by abstracts in both Indonesian and English. The abstract should be written concisely, clearly, comprehensively, independently, and fully describe the essence of the entire paper. It should be between 150–200 words in length. The abstract must provide readers with information on the research problem, objectives, methods, research findings, and the study's contribution. Use precise diction to effectively convey the results of your research.

Keywords: Use 3–5 keywords/phrases separated by commas (,). Choose keywords that reflect the main ideas of your article, without mentioning institution names, regulations, or locations.

Abstrak

Konsep keadilan distributif dalam ekonomi Islam menawarkan alternatif terhadap sistem ekonomi kapitalis yang sering kali menghasilkan ketimpangan dan kesenjangan sosial. Sementara kapitalisme mengedepankan keuntungan dan kebebasan pasar, ekonomi Islam menekankan distribusi kekayaan yang adil berdasarkan nilai-nilai tauhid (keesaan Tuhan), khilafah (tanggung jawab sebagai khalifah), dan maslahah (kepentingan umum). Penelitian ini bertujuan untuk menganalisis secara kritis bagaimana prinsip keadilan distributif dalam ekonomi Islam dapat menjawab permasalahan

ketidakadilan dan kesenjangan ekonomi kontemporer. Dengan menggunakan metode kualitatif deskriptif melalui pendekatan studi pustaka integratif, kajian ini menganalisis teks-teks ekonomi Islam klasik dan literatur kontemporer, dengan fokus pada tema keadilan, redistribusi kekayaan, dan tata kelola ekonomi yang beretika. Hasil kajian menunjukkan bahwa keadilan ekonomi Islam tidak hanya menuntut pelarangan praktik eksploitatif seperti riba dan monopoli, tetapi juga membutuhkan peran aktif negara dalam [illegible]ur distribusi serta mendorong kesejahteraan sosial. Integrasi nilai-nilai [illegible]seperti keadilan, amanah (kepercayaan), dan tanggung jawab sosial dalam perumusan kebijakan ekonomi dipandang esensial untuk mewujudkan pembangunan yang inklusif dan berkelanjutan. Penelitian ini menyimpulkan bahwa kerangka keadilan distributif dalam ekonomi Islam menawarkan pendekatan yang holistik dan berbasis nilai dalam kebijakan ekonomi, dengan potensi penerapan nyata dalam mengatasi kemiskinan struktural dan membangun masyarakat yang adil.

Kata Kunci: Filosofi Keadilan, Distributif, Kesejahteraan, Ekonomi Syariah

Introduction

The introduction contains the background of the article, including the academic concerns underlying the study, and may be supplemented with statistical data. Authors are encouraged to include a literature review to demonstrate the novelty of the research. The literature review should be based on previously published scholarly journal articles, serving to establish the state of the art. Authors should highlight the strengths and weaknesses of previous studies, then explain what they expect from their own work (to address these limitations) as formulated in the research objectives. References should consist of recent journal articles published within the last five years. The background should include the main question regarding the issue to be discussed and the solution to be proposed.

The author should also briefly explain the methods used and how these methods were applied. The methodology should cover the type of research, approach, data sources, data collection techniques, and data analysis.

The minimum length is 15 pages or 5,000–6,000 words, excluding references.

Discussion I

The research results should be written clearly and concisely, focusing more on summarizing the findings rather than presenting detailed raw data. It is recommended to provide a review of how your results or findings differ from previous studies. The discussion section is the most important part of the article, as it offers an opportunity for the author to explore the data. It typically begins with a summary of the research findings, followed by a discussion using relevant theories or references. Theories or references used must be accompanied by clear citations.

Discussion II

The research results should be written clearly and concisely, focusing more on summarizing the findings rather than presenting detailed raw data. It is recommended to provide a review of how your results or findings differ from previous studies. The discussion section is the most important part of the article, as it offers an opportunity for the author to explore the data. It typically begins with a summary of the research findings, followed by a discussion using relevant theories or references. Theories or references used must be accompanied by clear citations.

Tables and figures should be numbered sequentially. The table title and number should be placed below the table. Example:

Tabel 1. .....

Name	Name	Name	Name	Name
1	A	A	A	A
2	B	B	B	B
3	C	C	C	C
4	D	D	D	D

Conclusion

The conclusion is the final statement of the article and should address the research objectives, formulated in a concise and effective manner. The conclusion is not a summary of the discussion but is expected to contain theoretical implications, explaining how your research or ideas can contribute to the advancement of the field of family law.

APA Citation

The guidelines for writing footnotes and reference lists follow the **APA**. It is recommended to use a reference manager such as Zotero or Mendeley for citation and reference formatting
