

Our Tech Tuesday Tip: Hiding Canvas Overall Grade

Using two software platforms with grade books like IC and Canvas, a student or parent can get confused about which platform gives the correct overall grade. To help avoid this confusion, we have a simple way to hide the overall grade in Canvas. Individual graded assignments can still be viewed, just not the average that Canvas calculates. Click on your Course, choose Settings, then scroll down to choose More Options. You will see a list of boxes to check. Check the box for Hide totals in student grades summary and then choose Update Course Details.
