ABSTRACT
(Center, Times New Roman 10, UPPERCASE, Bold, 1 spacing)

Introduction*: The abstract comes after the title page in the manuscript. The abstract must be integrated and independent, consisting of an introduction that clearly states the purpose of the research*

Methods: *This research is a quantitative study that applies the Johansen Integration Test and Vector Error Correction Model to examine the long-term impact and shock response on certain variables.*

Results: *Report the primary outcome(s)/findings, including (where relevant) levels of statistical significance. For example, the findings indicate short-term and long-term causality between macroeconomic variables and the Indonesian Islamic stock index. Especially in the long run, the industrial production index and inflation have a significant effect on ISSI, while the exchange rate, interest rates, and SBIS have no considerable effect on ISSI*

Conclusion and suggestion: Should relate to the study aims and hypotheses. However, the abstract should be written as a single paragraph without these headers. For this reason, references should be avoided. Also, non-standard or uncommon abbreviations should be avoided, but if essential, they must be defined at their first mention in the abstract itself. Abstracts must be written in 150 to 250 words, without references, and accompanied by keywords. (Times New Roman 10, Italic, justify, 1 spacing, 150-250 words).

INTRODUCTION-Heading 1 (Times New Roman 10, Bold, Align Left, UPPERCASE)

State the objectives of the work and provide an adequate background, avoiding a detailed literature survey or a summary of the results. Explain how you addressed the problem and clearly state the aims of your study. As you compose the introduction, think of readers who are not experts in this field. Please write in narrative form, not using sub-chapters. (Times New Roman 10, 1.15 Spacing, Justify). (Elaborate this section to 500–700 words while maintaining its relevance, clarity, and academic consistency)

LITERATURE REVIEW- Heading 1 (Times New Roman 10, Bold, Align Left, UPPERCASE)

There are three points that will be discussed in the literature review: the basic theory, previous studies, and hypotheses from previous studies, ……. (Times New Roman 10, Justify) 200–300 words per subsection

The traditional society– Heading 2 (Times New Roman 10, Bold, Capitalize Each Word)

The traditional society In Rostow's development theories, the traditional society is one where economic activities by traditional methods in production, distribution, and consumption activities. In Rostow's point of view….. (Times New Roman 10, Justify,)

Previous Study and Hypothesis – Heading 2 (Times New Roman 10, Bold, Capitalize Each Word)

The preconditions for take-off In this phase, Rostow sees society in a transition phase; society optimizes itself to strengthen and improve its economy..... (Times New Roman 10, Justify)

RESEARCH METHODS – Heading 1 (Times New Roman 10, Bold, Align Left, UPPERCASE)

Explain in detail the research design, settings, time frame, variables, population, samples, sampling, instruments, data analysis, and information on ethical clearance and fit test. This paper uses the library method, which emphasizes literature as the primary data source. This research is a quantitative study that applies the Johansen Integration Test and Vector Error Correction Model to see the long-term impact and shock response on certain variables…(Times New Roman 10, Justify, 300–500 words)

Formulas using equation

$$Rt = \ln ln\,(Pt - Pt - 1) + \frac{\alpha}{\beta} \quad \ldots\ldots\ldots (2)$$

RESULT AND ANALYSIS-Heading 1 (Times New Roman 10, Bold, Align Left, UPPERCASE)

Results should be presented continuously, starting from the main result until supporting results. Use units of measurement that follow the prevailing international system. You may also present diagrams, tables, pictures, and graphics, followed by narration. Elaborate the Results section to 1,000–1,500 words.

Describe the significance of your findings. Consider the most important part of your paper. Do not be verbose or repetitive; be concise and make your points clearly. Follow a logical stream of thought; in general, interpret and discuss the significance of your findings in the same sequence you described them in your results section. Use the present verb tense, especially for established facts; however, refer to specific works or prior studies in the past tense. If needed, use subheadings to help organize your discussion or to categorize your interpretations into themes. The discussion section includes an explanation of results, references to previous research, deductions, and hypotheses. (Times New Roman 10, Justify)

Figures, tables, and diagrams should be **editable**; tables should not be pictures

Table 1 (Center, Calibri 10)

Consumption on Ramadan (Center, Calibri 10)

No.	Staple Food Ingredients	Consumption per capita (kg / capita)		
		2006	2007	2008
1.	Rice	83,24	80,56	81,52
2.	Corn	75,68	53,82	50,37
3.	Wheat	44,96	43,60	35,49

Total	203,88	182,98	167,38

CONCLUSION-Heading 1 (Times New Roman 10, Bold, Align Left, UPPERCASE)

Conclusion should be explained clearly related to hypothesis and new findings. Suggestions might be added; they contain recommendations on the research done or an input that can be used directly by consumers (Times New Roman 10, Justify). (The Conclusion section (200–300 words)

REFERENCES-Heading 1 (Times New Roman 10, Bold, Align Left, UPPERCASE)

The author-year notation system is required and completed. List all references in the reference list in APA 6th Edition style, arranged A to Z. Include at least 25 recent references (last 10 years), with 80% from journals. All cited references must be mentioned in in-text citations. If you are a Mendeley user, please download the reference style here. Use a DOI link in every article. **Include at least one citation from an article in the Maneksi journal**. https://www.mendeley.com/guides/harvard-citation-guide
