Greetings.

If you are reading this you are one of the few persons involved in the development of the project Dagoon at the Hana station in L4 we inform you that the station has gone silent. several attempts at communication have failed both with the station and its guard squad and due to the secrecy of the base reinforcements would arrive in approximately 24 days. due to the importance of the experiment the higher order has decided to arrange a small team of very loyal soldiers supported by mercenaries. they can be there within the day and their mission will be to retrieve the experiment from the facilities and destroy all the data from the Laboratory computers. once this is down they will rendezvous with main army and deliver the cargo.

for this mission we have selected the following personnel:

Lieutenant Storm Dream a Decorated medic highly valuable due to his interrogator skills he will be the head of the operation at the Hana station.

Ace Pilot Rain Rocket The best mech pilot in the zone, and highly known for Her fanatic loyalty to the army, she will be the officer's personal guard and aide.

Baldwyn a griffin rescue operator, used to work on a asteroid mining company as a safety and rescue manager renowned for his piloting skills

Tool Stones a technician, he has made his living as a wandering mechanic, and has a history of minor crimes and association with smugglers.

Banana Jubilee a space merchant has several investigations due her links to criminal organizations.
