## Kickstart Your Career in Automotive Embedded Systems

Are you good at logical thinking, and wish to pursue a career in Automotive Embedded Software Development?

In collaboration with DreamCatcher, Continental Automotive Components Malaysia invites ambitious talents to apply for our micro-credential program with permanent **software engineer** positions to accelerate your career.

### WHO IS IT FOR?

- Young Malaysians who are ready to launch their careers in Automotive Embedded Systems.
- Critical thinkers with strong learning aspiration and passion for creative problem-solving.
- Individuals seeking to socialize into MNC high-performance culture.
- Undergraduate students seeking 6-month internships in the final semester.

### WHAT WILL YOU GET?

- Joining a global automotive leader as software engineers.
- 3 months of full-time intensive training on Programming and Software Development Skills for Automotive Embedded Systems.
- A micro-credential certificate recognized by the industry.

### WHAT SHOULD YOU HAVE?

- Any technical degree with strong logical thinking & passion for developing automotive software.
- Fresh graduates (or experienced professionals passionate about automotive software development).
