INTRODUCTION (12pt)

The introduction contains background, problem formulation, research objectives, and a literature review. This section asks The author to formulate the problem concretely and clearly.

This section is supported by a literature review that is used as a support for the research concept. Authors must present an up-to-date primary literature review (references to journal articles and conference proceedings) (references published within the last five years). The literature review is not limited to theory but also includes empirical evidence. Enrich this introductory section with the efforts that others have made.

RESEARCH METHODS (12pt)

(Write here) ... Research methods describe data, research tools, approaches, activity design, scope or objects, primary materials and tools, places, data collection techniques, operational definitions of research variables, and analysis techniques.

RESULTS AND DISCUSSION (12PT)

(Write here) ... This section presents the study results; the number of pages is 25–30% of the total pages. Research results can be supplemented with tables,

graphs (figures), and charts. The discussion section describes data processing results, interprets findings logically, and links with other research or relevant reference sources. Name the advantages and uniqueness of this study compared to other studies. png/jpg image format. The structure of writing results must match the research method so that each step in the process is given results and discussed.

CONCLUSION (12pt)

(Write here) ... The conclusion contains a summary of the results of the research and discussion. The decision should be concise and answer the purpose of the study. Spelled out in the narrative, not bullet points.
