Summary

Detail-oriented Data Analyst with a year of experience in translating business needs into data-driven insights, working with large datasets, and building data models to drive business outcomes. Seeking to leverage strong SQL skills, data modeling expertise, and a commitment to process improvement to contribute to Cargill's mission of making a positive, sustainable impact in the world.

Experience

Supply Chain Planning & Analytics Co-Op

Collaborated with supply chain teams to analyze demand fluctuations and support procurement strategies.

Used Excel and Tableau to create inventory dashboards that helped streamline inventory management processes and reduce overstock by 15%.

Conducted cross-functional meetings to coordinate delivery schedules with logistics and vendor partners.

Assisted in documenting and optimizing Standard Operating Procedures (SOPs) to improve onboarding processes.

Operational Assistant in Special Projects

Faro Innovación de Negocios

Feb 2020 - Jul 2020 (6 months)

Spearheaded a project that improved order fulfillment times by 10% by analyzing warehouse workflows and implementing optimized delivery routes.

Led weekly performance review meetings with operations and finance teams to ensure KPIs were met.

Developed and maintained relationships with internal stakeholders, facilitating better alignment between supply chain, logistics, and customer demand.
